ADVISOR TRAINING SYSTEM

The Playbook That Turns Scripts Into Instinct

YOUR CAREER STARTS ON THE NEXT PAGE

Master every call. Win every bay. Build a book that follows you for life.

LEVELS	BOSS BATTLES	AI DRILLS	VERSION
5	8	12+	2.0

PRO TIP | WHAT THIS BOOK IS

This is not a binder that sits in a drawer. It is a training weapon. Every script inside has been battle-tested across thousands of real calls. The words are exact. The order matters. The psychology is deliberate.

Your job is not to read it. Your job is to absorb it until the words disappear and the instinct remains.

How it works: Read the script. Study the decoder. Run the drill. Pass the mastery check. Level up. Repeat until the phone feels like home.

HOW TO PLAY

Every advisor in this company started exactly where you are right now—holding a script, wondering if it will sound fake, hoping the customer does not ask something unexpected. This system exists to collapse the time between that feeling and the moment you realize you own the room.

The Five Levels

Level 1 — ROOKIE Read the script. Survive the call. No improvisation.

Level 2 — ADVISOR Run the script naturally. Identify the real concern behind the question.

Level 3 — CLOSER Own the East-West close. Book the appointment on the first offer.

Level 4 — PRO Defeat every boss battle. Re-open the missed sale. Customers trust your voice.

Level 5 — CHAMPION Customers ask for you by name. You train others. You build the book.

Module Key — What Each Box Means

SCRIPT — The exact words. Memorize tone, not just text. Never paraphrase the close.

PSYCHOLOGY DECODER — Why the script works on the human brain. Master this and you stop sounding scripted.

DRILL — A practice rep. In the app, the AI plays the customer. Here, use a partner.

MASTERY CHECK — The gate. Pass it in live calls and you level up.

STOP — A hard gate. Do not advance until the action is complete.

PRO TIP — Veteran shortcut. Earned the hard way so you don't have to.

The Invisible Scorecard

Every customer who walks through the door is silently grading you on three things:

1. Competence — Do you actually know what you're talking about?

2. Transparency — Are you hiding anything from me?

3. Trustworthiness — Would you do this for your own family?

Score all three and price becomes irrelevant. Lose any one and price becomes the only conversation you will ever have.

LEVEL 1 — THE INBOUND CALL

Mission: Convert a stranger's question into a committed appointment.

GOAL BOOK IT	TIME ≤ 4 MIN	RING LIMIT 2	WIN CAR ON CALENDAR
------------------------	------------------------	------------------------	-------------------------------

Mission Brief

The phone is the front door to every dollar this shop will ever make. Most competitors blow it open by quoting a price, sounding bored, or letting the customer drive. You are going to do the opposite—sound genuinely glad they called, take control with one surgical question, and assume the appointment before the customer has time to comparison-shop.

STOP | THE GOLDEN RULE

Your immediate goal is NOT a sale. It is to convert the inquiry into a vehicle committed for service. Quote a price over the phone and you lose both the sale and the relationship.

The Opening

SCRIPT | Pick Up Before Ring Three

Ring-Ring (The phone should NEVER ring more than TWICE!)

You: (SMILE!!) "Thank you for calling [store name]. My name is [your name]." [PAUSE]

PSYCHOLOGY DECODER | Why the Pause Wins

Intentionally pausing is a powerful communication technique because it immediately grabs the caller's attention, shifting them into listening mode. The brief silence acts as a confident and human conversational handoff, clearly signaling that it's the customer's turn to speak and preventing them from feeling rushed, while psychologically inviting engagement because they perceive you are present and in control.

SCRIPT | First Response

You: [Let the customer speak] If they hesitate: "How can I help you today?"

Customer: "Do you work on brakes?", "Can I get a quote on some tires?", "What's your price for an oil change?", "I need an Alignment"

You: "You have called the Right Place!! Is this your first time with our shop?"

Branch A — First-Time Caller

SCRIPT | Customer says: “Yes, it’s my first time.”

Customer: “Yes, it’s my first time.”

You: Thank you so much for calling us! We are [insert shop name] your certified dealer alternative, located at [address] we are open 6 days a week from [insert store hours]. We have ASE and dealer certified technicians ready to handle all of your vehicle needs from tires, service, to major repairs. We stand behind our work offering warranties up to 3 years or 36,000 miles. We also offer complementary shuttles, vehicle pick up and drop off, ride services as well as rental car reimbursement and loaner vehicle when available!” What kind of concern are you having with your [vehicle/brakes/tires/oil system/alignment]?” (Send shop introduction link)

Branch B — Returning Caller

SCRIPT | Customer says: “I’ve been in before.”

Customer: “I’ve been in before, I was just hoping for a quote.”

You: “I completely understand, What kind of concern are you having with your [vehicle/brakes/tires/oil system/alignment]?”

PSYCHOLOGY DECODER | Concern vs. Symptom

Prioritize asking clarifying questions to identify the customer’s root concern rather than just the symptom they are presenting. It is essential to understand the underlying issue before providing advice to ensure it is effective and appropriate.

The Concern Pivot

SCRIPT | From Question to Appointment

Customer: States the concern. “My brakes are squeaking”, “My tires are getting low”, “The oil light on my dash came on and it’s due for service”, “My car is pulling to the left.”

You: “Oh wow! WHEN you’re experiencing [INSERT EXACT CUSTOMER CONCERN], it’s always best to bring your vehicle in and have it inspected by one of our certified technicians! Is now a good time?”

PSYCHOLOGY DECODER | The Power of “Oh Wow!” + “WHEN”

The inclusion of an exclamation conveys a sense of urgency, thereby implying the significance of the concern and the necessity of immediate resolution.

Be prepared to address a time objection should the client be unable to bring the vehicle in immediately, by either scheduling a convenient future appointment or by assisting in the logistics required to retrieve the vehicle.

Saying “WHEN you’re experiencing this” (not “if”) presupposes the concern is real. The brain skips past whether and lands on what now.

SCRIPT | Customer Commits

Customer: "Yes, I'm bringing the car in."

You: "Great, stay with me on the line really quick while I..."

If the customer has been here before: "Get you confirmed in our system."

If the customer has never been here before: "Gather your information to build a customer profile."

STOP | END THE CALL ONLY WHEN...

The information required to Create an RO or Appointment and document the customer concern has been gathered.

OR you are able to send the appointment confirmation or the RO Estimate with the customer concern documented.

INBOUND MINI-BOSSSES

Four objections live on every inbound call. Each has a tell—the line the customer says. Each has a counter—the line you deliver without hesitation. In the app, the AI will throw these at you randomly until you can counter on reflex.

MINI-BOSS #1

They say: *"Yeah, I just want to know how much it will cost before I come in."*

You say: (Confident tone) "AT NO COST TO YOU! I will personally inspect your vehicle alongside one of our certified technicians and provide you with a complete written estimate. When should we expect to see the vehicle?"

Why it works: *Reframes the price ask into a free personal benefit. The closing question assumes the appointment, not the price quote.*

MINI-BOSS #2

They say: *"I have a quote already from another shop, that's why im just looking for a price!"*

You say: "Oh, excellent! If you can bring that with you, that would be tremendously helpful! We actually have a 'Meet or Beat' policy that allows us to price match like-for-like quotes if we don't naturally beat the price with our estimate. However, to give you the most accurate pricing, it's best if our certified technician takes a look first to identify exactly what's needed to fix the [Insert customer concern]. When should we expect to see the vehicle?"

Why it works: *"Excellent!" disarms the comparison shopper. Meet-or-Beat lowers risk. Then a hard pivot to the appointment.*

MINI-BOSS #3

They say: *"Yeah, but do you have a ballpark for me? Like, I just want to know how much they will cost."*

You say: "I completely understand! I will personally inspect your vehicle alongside one of our certified technicians and provide you with a complete written estimate to allow you to make informed decisions. If budget is your primary concern, I will work with you to select cost effective solutions that will still provide good warranty coverage on both parts and labor. As far as a ballpark I can pull up a tool we use called repairpal and give you an idea of what something like this normally costs to repair."

Why it works: *Validates the request, then offers a third-party data point (RepairPal) instead of an unbacked price you can't honor.*

MINI-BOSS #4

They say: *"I'm not sure yet. Let me think about it."*

You say: “I completely understand. Before you decide, may I ask what’s most important to you, price, turnaround time, or overall service?” (Listen carefully.)

Why it works: *Loops the conversation back open with a value-priorities question—almost no one says “price” when forced to rank.*

PSYCHOLOGY DECODER | The Ballpark Trap

When customers ask for a “ballpark” price, the advisor should emphasize that providing an accurate, meaningful estimate requires an inspection due to variations in vehicle type and condition, framing this as a necessary step to mitigate risk rather than simply discussing price. If pressed, the advisor can offer a general range but must pivot quickly to scheduling the vehicle for an inspection to deliver a firm, written estimate before any work begins, always maintaining the focus on getting the vehicle into the shop for an accurate assessment.

Advisor Tone and Goal

Tone: Be upbeat, confident, and helpful (smile!).

Immediate goal is NOT a sale.

Objectives:

1. Assure customer they called the right place.
2. Schedule vehicle service.

Strategy Overview

Goal: Convert inquiry → Car committed for service.

DO

- Identify the CONCERN.
- Control with direct questions.
- SET THE APPOINTMENT; don't sell parts/labor over the phone.
- Establish authority before pricing.
- Maintain professionalism.

DON'T

- Avoid simple "Yes, we do."
- Never quote blindly. Redirect to inspection.
- Never argue.
- Never discount immediately.
- Don't let the customer drive the call.

PRO TIP | The Professional Standard

Never argue. Never discount immediately. Clarify decision criteria. Reinforce value. Control next steps. Convert simple calls to long-term relationships. Build value before quoting price. Make the customer informed, not sold.

POWER MOVE: East-West Scheduling

The technique that fills the calendar without sounding like a robot.

When booking customer appointments, utilize the “East-West” method by offering times either 15 minutes after or 15 minutes before the hour.

SCRIPT | The Move

“I have an opening at 9:15 am or 10:45 am. Which works best for you?”

Core Principles

- Offer Two Options: Always provide the customer with two choices.
- The Options: One time must be :15 after the hour, and the other must be :45 till the hour.
- Be Confident: State the times firmly and avoid tentative language (e.g., “uh” or “maybe”).
- Close with a Choice: Use a choice question (e.g., “Which works best?”) instead of an open-ended one (e.g., “What time works?”).

Handling Objections

- If the customer hesitates: Ask, “What’s on your mind?”
- If they request a different time: Re-anchor them with, “The closest options I have are 2:15 PM or 2:45 PM.”

PSYCHOLOGY DECODER | Why East-West Beats “What Time Works?”

Open-ended scheduling forces the customer to do work—pick from infinity. The brain’s default response to that work is hesitation. Two specific options collapse infinity into a binary, and most humans answer a binary on the first try. You are also signaling that your calendar is real and full, which is a quiet authority cue.

Benefits

- Creates a balanced appointment book.
- Reduces congestion during peak times (early and late on the hour).
- Establishes you as the professional guide.
- Significantly increases the likelihood of a “yes” on the first offer.

DRILL | East-West Speed Reps

With a partner (or the AI in the app), run 10 reps. The partner picks a random objection; you respond with East-West.

3. “I can’t come in until next week.”
4. “What’s your earliest opening?”
5. “Do you have anything later in the day?”
6. “I want to come Saturday.”

7. “What time works?”

Goal: first-offer close on 7 of 10 reps. Hit it and you’re a Closer.

MASTERY CHECK | LEVEL 1 MASTERY

- ☐ Picked up before the third ring with a smile in my voice.
- ☐ Paused after my opening line and let the customer speak first.
- ☐ Never quoted a price over the phone.
- ☐ Used “WHEN you’re experiencing...” instead of “if.”
- ☐ Closed with the East-West choice question.
- ☐ Ended the call with the car on the calendar OR an estimate sent.

Pass all 6 in three consecutive live calls → Level 1 cleared. You are now an ADVISOR.

LEVEL 2 — ARRIVAL AND DROP OFF

Mission: Make a friend in 90 seconds.

GOAL TRUST	TIME ≤ 90 SEC	TOOLS KEYS + BOOM BOARD	WIN CUSTOMER COMFORTABLE
----------------------	-------------------------	-----------------------------------	------------------------------------

Mission Brief

First-time customers are evaluating Competence, Transparency, and Trustworthiness. The shop tour is your one-shot to lock all three in before any conversation about money happens.

SCRIPT | The Approach

You: “Welcome to [Shop name], I am [your name] and I’ll be assisting you today, may I have your keys please!”

Greet the customer in the parking lot or by the front door and request their car keys. Have your boom board on you!

If the customer already called the shop you should need nothing but the keys from them and confirmation of contact information at this point.

For walk-ins, fill out the boom sheet and proceed.

Perform shop tours in full for all first time customers, returning customers should be informed of any updates or changes since their last visit.

The Shop Tour Script

SCRIPT | Deliver with eye contact, walking pace, and warmth

“Welcome to [insert shop name], your certified dealer alternative.

We’re proud to have certified technicians ready to take care of all your vehicle needs, from tires and routine maintenance to major repairs. We also partner with trusted local specialists to help with accessory services like dent repair, body work, windshield replacement, and more so you’re covered in one place.

To make your visit as convenient as possible, we offer complimentary shuttle rides, Uber or Lyft transportation, rental car reimbursement, and loaner vehicles when available. If you choose to stay, our waiting area has complimentary water, coffee, and tea but there’s no need to wait if one of our transportation options works better for you.

Once you drop off your vehicle, you can rest easy knowing we’ll keep you informed every step of the way. We communicate through calls, texts, digital vehicle inspections, and electronic approvals for estimates, invoices, and even payments. Clear, simple, and transparent.

We're excited to serve you today, and thank you for trusting [insert shop name]. Can I get you something to drink—coffee, water, or tea?"

The shop tour ends with an escort to the Customer waiting lobby and the customer is seated or comfortable to be left alone.

PSYCHOLOGY DECODER | The Three Hidden Sales Inside the Tour

- 1. Authority by association** — "Certified dealer alternative" puts you in the dealer's league without their price tag.
- 2. Reciprocity trigger** — Offering coffee/water creates a tiny obligation that softens the hardest objections later.
- 3. Process transparency = price defense** — Customers who SEE the process complain less about the price.

MASTERY CHECK | KEY REMINDER

First-time customers are evaluating: **Competence, Transparency, and Trustworthiness. MAKE A FRIEND!**

DRILL | The 90-Second Tour

Pair up. One person plays a nervous first-timer. The other delivers the tour from memory in under 90 seconds while walking. Score each other 1–10 on:

- Smile and eye contact
- Mention of warranty and transportation options
- Drink offer at the end
- Customer comfort level after

Goal: Score 8+ on three consecutive runs.

LEVEL 3 — BASE SELLING

Mission: Run the bases. Score the trip.

1ST BASE ISOLATE	2ND BASE EXPAND	SHORT STOP SAVE	3RD BASE PROTECT
----------------------------	---------------------------	---------------------------	----------------------------

Why Baseball?

Sales is not a sprint or a wrestling match—it is a series of disciplined plays. You have to touch each base in order. Skip second to swing for the fence and you strike out. The customer feels rushed, distrust spikes, and they shut down.

First base is about clarity and trust addressing what matters most without overwhelming the customer.

FIRST BASE — Isolate the Customer Concern

SCRIPT | Step 1: Permission to speak

“Hi [Customer Name], this is [Your Name] with [Store Name]. Is now a good time to review our findings?”

SCRIPT | Step 2: Good-Good-Bad

“You brought your vehicle in for [insert customer concern] and I reviewed the findings personally with the technician to ensure accuracy.”

“Good news is I was able to capture a good video of what is going on. Did you receive the DVI findings I sent via Text/Email?” (Do not continue without confirmation)

“More good news, we have identified the cause of your concern!”

PSYCHOLOGY DECODER | Why Good-Good-Bad?

Two positives prime the brain into a receptive state. The third statement (the cost/repair) lands inside an open mind instead of a defensive one. Lead with the bad news and you trigger fight-or-flight before the customer has heard a single solution.

SCRIPT | Step 3: Problem • Risk • Solution (PRS)

Speak Confidently.

- State the Problem in full (Should always be an AI generated script)
- State the Risk associated with the problem. (Should always be an AI generated script)
- State the proper Solution to the problem. (Should always be an AI generated script)
- State the Total investment for the problem to be solved.

- State the coverage we provide to the solution to the problem. (Warranty Info)
- “While the vehicle is here we will also finish up the complete bumper to bumper inspection and will reach out with any additional concerns. Is this still the best number to reach you?”

SCRIPT | Steps 4 and 5

Step 4: Answer Questions, Overcome Objections (Reference Objection Handling)

Step 5: Obtain Authorization to address the customer concern

STOP | DO NOT MIX BASES

Do not move to additional concerns until the original concern is authorized. Mixing items here is called “kitchen-sinking” and it destroys trust.

FIRST BASE (Variant) — Isolate Safety Concern(s)

STOP! Has the Customer concern already been addressed?

- If yes: Continue.
- If no: Isolate Customer Concern (above).

SCRIPT | Step 1: Permission to speak

“Hi [Customer Name], this is [Your Name] with [Store Name]. Is now a good time for an update on your vehicle?”

SCRIPT | Step 2: Good-Good-Bad

“You brought your vehicle in for [insert customer concern], We have completed our Initial Inspection and we did identify a safety concern that requires your immediate attention!”

“Good news! I was able to capture a good video of what is going on. Did you receive the DVI findings I sent via Text/Email?” (Do not continue without confirmation)

SCRIPT | Step 3: PRS (Safety variant)

Speak Confidently.

- State the Problem in full (Should always be an AI generated script)
- State the Risk associated with the problem. (Should always be an AI generated script)
- State the proper Solution to the problem. (Should always be an AI generated script)
- State the Total investment for the problem to be solved. (Include the price of the customer concern)
- State the coverage we provide to the solution to the problem. (Warranty Info)

“While the vehicle is here we will also finish up the complete bumper to bumper inspection and will reach out with any additional concerns. Is this still the best number to reach you?”

SCRIPT | Steps 4 and 5

Step 4: Answer Questions, Overcome Objections (Reference Objection Handling)

Step 5: Obtain Authorization to address the safety concern(s)

STOP | AUTHORIZE BEFORE ADVANCING

No exceptions.

First Base Strategy: Isolate

First base is always isolation. The priority is to isolate and address the customer's original concern, the specific reason they brought the vehicle in. At this stage, nothing else should be discussed. Focus only on resolving what the customer asked us to look at.

If the customer concern has already been fully addressed, then first base shifts to isolating safety concerns. These are items that absolutely must be handled to keep the vehicle safe and reliable.

We do not kitchen-sink the customer. That means we do not mix in items that could, might, or should be done alongside critical concerns.

SECOND BASE — Additional Concern Presentation

Present remaining maintenance and mechanical items needed.

SCRIPT | Step 1: Permission to speak

“Hi [Customer Name], this is [Your Name] with [Store Name]. We have completed the Service inspection and have concerns that require your attention, is now a good time to review the inspection findings?”

SCRIPT | Step 2: Media Verification

“Did you have a chance to review the pictures and videos I sent over on the report?”

If yes: Continue.

If No: Ask Permission to summarize and continue or wait for media confirmation.

SCRIPT | Step 3: Good-Good-Bad

“Good News is your vehicle’s overall health is in EXCELLENT condition!”

“The suspension system is operating properly. However, [State Problem, risk, solution] the axle boot is leaking grease. It’s not an immediate failure, but if left unaddressed it can damage the joint. The proper repair is to replace the CV Axle to ensure proper lubrication and protection.

Repeat until all Problems, risks and solutions have been presented.

SCRIPT | Step 4: Updated Total Investment

To address all the concerns, the updated total investment is \$____. And Obviously everything is covered by our 3 year 36k mile nation wide warranty on both parts and labor. (INCLUDES EVERYTHING ALREADY SOLD)

SCRIPT | Step 5: ASSUME THE SALE

“With the [safety or customer concern] in progress I can go ahead and order these parts and have the technician take care of everything at once, I will call you with an updated ETA when the parts arrive.”

PSYCHOLOGY DECODER | The Assumptive Close

By moving past the moment of decision and into logistics, you spare the customer the cognitive load of explicitly saying “yes.” Most customers won’t stop forward motion—they’ll only stop a request. Speak as if the answer was always going to be yes, and 8 out of 10 times it is.

SCRIPT | Steps 6 through 8

Step 6: Answer Questions, Overcome Objections (Reference Objection Handling)

Step 7: Obtain Authorization to address the additional concern(s)

Step 8: Tee Up 3rd base

“Great, we will get the parts ordered right now. The last thing I’m going to do is check for any upcoming scheduled maintenance and will call you back with the maintenance plan to protect this investment and set you up to avoid work building up like this again, and you know what to anticipate for your next visit!”

STOP | STOP

Don’t roll into 3rd base on the same call. Hang up. Reset. Re-call. Earn the next conversation.

MASTERY CHECK | KEY REMINDER

Inspection presentations succeed because of: Structure, Clarity, and Confidence. Not persuasion tactics.

SHORT STOP — Missed Sale Re-Open

Tag in a Partner and get authorization to get the car fixed.

SCRIPT | Tone: CONCERNED

“Hi [Customer name], this is [You name] from [Shop]. I understand you have been working with [Strike outs name] Do you... have a second for me?

“Great, I am just calling about [Whatever must be sold to keep this car safe and reliable] I know [strike out] called to review the concern with you and he has informed me that you did not want to proceed with the repair? Is that accurate?’

The customer will either confirm or state the true objection.

If Objection: Overcome Objections

If Confirmation:

“I See, that brings me to the reason I’m calling. I wanted to ensure that we effectively communicated the severity of the concern, [Insert simple Problem, simple Risk, Minimum viable solution].

Overcome objections. CLOSE!!!

PSYCHOLOGY DECODER | Why a Fresh Voice Wins the Save

The customer has already said “no” once and emotionally committed to that no. A new voice resets the social contract—they don’t feel like they’re flip-flopping, they feel like they’re hearing it fresh from someone who genuinely cares about their safety.

THIRD BASE — Scheduled Maintenance

Sell maintenance that will come due before the next visit; otherwise schedule it out.

SCRIPT | The 3rd Base Pitch

You: “The remaining items fall into preventative maintenance.

Your transmission and differential fluids are overdue or coming due within the next 10k based on mileage so ideally we should address those two services today while we have the car. Addressing them now keeps the systems up to date and maintains the lifetime protection plan, leaving the only services due next visit [Insert Services due within 10k] and the service after that will be the [Insert Plan].

Addressing the items due will move your total investment for today’s work from XXX to XXXX.

These services are covered by the JB Limited lifetime protection plan that will keep the major system components like [Expensive part] covered for unlimited miles so long as the services do not go overdue.

Can I have the tech get everything fully up to date while it’s in the shop?”

This is a soft sell and should not feel high pressure. If you get an objection let the client know we can always schedule the services out for the next visit.

Strategy: Calm tone. No urgency stacking. Long-term ownership framing.

Base-Selling Power-Ups

- Re-engage the conversation every 60–90 seconds.
- Never rush the price.
- DO NOT pause after investment—keep flowing to coverage.
- **Close confidently. You did not cause the problem! You have the SOLUTION!**

Re-Engagement Lines

SCRIPT | Use one every 60–90 seconds

“Does that make sense so far?”

“Were you able to see that in the photo?”

“Any other concerns you’d like to share?”

Assumptive Close Lines

SCRIPT | Land these without hesitation

“I’ll go ahead and move forward with that!”

“The parts will take a few hours to get here so long as I can hang up and place the order now!”

“Would you prefer option A or option B?”

“Anything else you’d like to add before we move forward?”

“We really need to fix this problem, do you need any more information from me?”

DRILL | The 60-Second Re-Engagement Game

Set a timer for 60 seconds. Run a mock 1st-base call. Every time the timer beeps, insert a re-engagement line without breaking flow. The AI will score your timing and phrasing.

HOME PLATE — Final Invoice Review

SCRIPT | Service Advisor

“(Mr. or Mrs. Customer), thank you again for trusting us with your vehicle today.”

“Here’s what we completed:

- Replaced brake pads and rotors
- Repaired the axle
- Updated your maintenance services

Everything has been digitally documented in your invoice.

Your total investment today is \$ ____.

Which direction would you like your vehicle facing when we bring it up?

Before you head out, a few benefits included with today’s service:

- 3-year / 36,000-mile nationwide warranty
- 365-day roadside assistance
- Post-repair inspection
- Maintenance reminders
- Lifetime protection enrollment (if applicable)

We just want vehicle ownership to feel easy and predictable.

We appreciate your business and we’ll be here whenever you need us.”

PSYCHOLOGY DECODER | The “Which Direction Facing?” Move

After the price, asking which direction the car should face when pulled up forces the brain into a logistical decision—which means the price has been silently accepted. The customer’s next thought is parking, not negotiation. This is one of the most quietly powerful closes in the entire book.

Manager Reopen Script (Missed Safety Sale)

SCRIPT | Manager

“Hi (Mr. or Mrs. Customer), this is [Manager Name] with [Shop].”

“I just wanted to personally thank you for your visit and check in on your vehicle. Did I catch you at a good time?”

[Pause]

“One reason I’m calling, there was a safety concern discussed during your visit. I reviewed it myself, and I just want to make sure you have a plan to address it, whether that’s with us or elsewhere.”

“My goal is simply to make sure you and your family are protected.”

“If there’s anything we can do scheduling, transportation, payment options we have availability. Would you like us to take care of that for you?”

PSYCHOLOGY DECODER | Why “Whether With Us or Elsewhere” Closes

By giving the customer permission to leave, you remove the salesperson energy entirely. They lower their guard. Now they are deciding based on safety, not on whether you are trying to extract money. Almost every time, the answer becomes “yeah, just do it.”

MASTERY CHECK | LEVEL 3 MASTERY

- ☐ Asked for permission to speak before delivering findings.
- ☐ Used good-good-bad framing on EVERY base.
- ☐ Stated full PRS (Problem · Risk · Solution) without skipping risk.
- ☐ Did not mix bases on the same call.
- ☐ Re-engaged the conversation at least every 90 seconds.
- ☐ Used at least one assumptive close line.
- ☐ Closed the visit with the “direction facing?” line.

Pass all 7 across two real workflows → Level 3 cleared. You are now a CLOSER.

LEVEL 4 — BOSS BATTLES

Mission: Defeat the eight objections that kill most sales.

These are the bosses every advisor will face. In the app, the AI plays each customer persona and scores your counter in real-time. Here, memorize the tell, drill the counter, and understand the psychology. Defeat all eight and you ascend to PRO.

BOSS 1 — “I’m Selling the Car”

Boss Battle — read it, drill it, beat it.

SCRIPT | The Exchange

Customer: “I appreciate everything, but I’m probably just going to sell it. I don’t want to put more money into it.”

You: “I completely understand. Big repairs can make you step back and rethink things.” “Out of curiosity — are you planning to replace it with something newer or used?”

Customer: “Probably used. I don’t want another big payment.”

You: “That makes sense. Let me give you something to consider.”

“Most used vehicles today are still a major investment and you’re inheriting someone else’s maintenance history. With your vehicle, we know exactly what condition it’s in because we just inspected it bumper to bumper. Based on what we saw, this vehicle still has strong life left in it.”

“Let me ask you this if you could purchase this exact vehicle, knowing the major systems have just been inspected and repaired, for a fraction of the cost of another vehicle... would that make sense?”

Customer: “I didn’t think about it that way.”

You: “Right now, you’re not throwing money at an old car. You’re making a smart investment in a vehicle you already own and understand. The average used car average is up to \$25,000 and the insurance rates are outrageous. To get this vehicle back to safe and reliable we are talking about [State total investment] I completely understand if you are simply in the market for a new car but if you are looking to make a smart financial decision, My profession advise would be to repair the care instead of buying a used care that may need the same in repairs or more.”

PSYCHOLOGY DECODER | Reframing Buy vs. Repair

The customer is comparing repair cost to \$0. You reframe it against the real alternative—the cost, risk, and unknown history of another vehicle. Once that frame lands, your repair becomes the cheap option.

BOSS 2 — “The Price Is Too High”

Boss Battle — read it, drill it, beat it.

SCRIPT | The Exchange

Customer: “That just seems like a lot.”

You: “I hear you. Let me ask, is it more than you expected, or are you comparing it to another estimate?”

Customer: “It just feels high.”

You: “Fair enough.

We’re not positioned as the lowest-priced option in town and that’s intentional.

We invest in experienced, certified technicians. We back our work with a 3-year / 36,000-mile nationwide warranty. And we stand behind it with real support if something ever comes up.

You’re not just paying for parts you’re investing in doing it correctly the first time. Have you ever gone with the cheaper option before and ended up paying for it twice?”

Customer: “Yeah...I suppose.”

You: “That’s exactly what we’re helping you avoid.”

“Let’s go ahead and get this handled properly so you don’t have to revisit it again. I’ll get it moving and keep you updated. Is this still the best number?”

PSYCHOLOGY DECODER | The Anti-Lowest-Price Brag

Saying out loud “we are not the cheapest, and that’s intentional” is a confidence move. Most shops apologize for price. Owning it makes the customer respect the price tag instead of fighting it.

BOSS 3 — “I Don’t Have the Money Right Now”

Boss Battle — read it, drill it, beat it.

SCRIPT | The Exchange

Customer: “I just don’t have the money today.”

You: “I completely understand. Auto repairs rarely show up at a convenient time, always after a big expense or when you least expect it.

Something a lot of our customers LOVE to take advantage of is our flexible payment options.

If I can take care of the repair now and let you pay me back with no interest can I get the parts ordered and move forward?

Customer: “YES!?”

(They laugh, you laugh... send them the link to fill out).

You: “I just sent you a link to fill out a form with one of our payment partners. Once complete I will see it come through on my side and we can go from there! Did you receive the link?”

It’s a good idea to stay on the phone with them as they fill out the form so you can close when the approved application comes through.

PSYCHOLOGY DECODER | The Money Reframe

Customers say “I don’t have the money” when they mean “I don’t have the money TODAY.” You are not selling the repair anymore—you are selling the option of solving the problem now and paying later. Almost no one declines that.

BOSS 4 — “I Need to Talk to My Spouse”

Boss Battle — read it, drill it, beat it.

SCRIPT | The Exchange

Customer: “I need to run this by my spouse first.”

You: “I completely understand. Decisions like this are definitely best made together.

To make sure both you and your spouse have all the correct information at the same time, the most efficient way to proceed is if we do a brief three-way call. I can review everything I just covered, you’ll both be fully informed, and you can make the best decision for your situation. Is your spouse available to join us now, or should I reach out to them to review this information and call you back?”

Customer: “Let me try to get them on the phone.”

PSYCHOLOGY DECODER | The Three-Way Bypass

Most “talk to my spouse” objections die in the parking lot. The decision never gets a fair hearing because the customer repeats it second-hand. By offering to be on the call yourself, you ensure the spouse hears the same PRS and warranty story that built trust in the first place.

BOSS 5 — “I’m Going to Wait”

Boss Battle — read it, drill it, beat it.

Strategy Overview

This usually means one of two things:

8. They’re unsure about urgency.
9. They’re avoiding committing.

Your job: Clarify risk if it’s a safety concern. Reframe value if it’s maintenance.

SCRIPT | Example 1: Safety Concern

Customer: “I think I’ll wait on that.”

You: “I understand. I do want to be transparent, this one falls into a safety category.

Right now the brakes are past normal wear and into potential damage. That can affect stopping distance and control.

Are you planning to drive it?”

Customer: “Yes, just around town.”

You: “Even short trips carry risk in this condition.

My job is to protect you, not pressure you. If budget is the concern, we can look at payment options but I don’t recommend postponing something that affects safety?”

SCRIPT | Example 2: Preventative Maintenance

Customer: “I’ll just wait on the fluid services.”

You: “No Worries, they’re not urgent today.

What we’re seeing in those systems is buildup that doesn’t show symptoms until damage starts. Doing them now protects the components while everything is accessible.

If we skip them today, are you planning to schedule it soon or wait until something starts acting up?”

Customer: “Probably the next oil change.”

You: “Understood. Just keep in mind preventative service is always less expensive than corrective repair.

If it makes sense to bundle it while it’s already here, we can space out the cost as well.”

BOSS 6 — “You’re Always Trying to Sell Me”

Boss Battle — read it, drill it, beat it.

SCRIPT | The Exchange

Customer: “Every time I come in, you try to sell me something.”

You: “I appreciate you saying that.

My goal isn’t to sell you, it’s to inspect your vehicle thoroughly and give you accurate information.

Every car that comes through our shop receives a full digital inspection. That means checking safety components, wear items, and potential issues before they become problems.

You’re never obligated to approve anything. But it’s my Professional Obligation to make sure you know what we see.

Would you like me to walk you through today’s inspection results so you can decide what makes sense?”

PSYCHOLOGY DECODER | The Pro Obligation Frame

Calling out your “Professional Obligation” shifts you from salesperson to fiduciary. The customer’s defenses drop because you just told them they are in control.

BOSS 7 — “I Need My Car Today”

Boss Battle — read it, drill it, beat it.

Strategy Overview

Two possibilities:

10. Real logistical need.
11. Avoiding decisions.

First solve transportation. Then return to the repair.

SCRIPT | The Exchange

Customer: “I really need my car today.”

You: “I understand.

Let’s solve the transportation side first. We have loaner vehicles, Uber rides, and pickup/drop-off options.

Would one of those help make this easier for you?”

Customer: “An Uber ride would help.”

You: “Perfect. I’ll get that arranged so we can repair your vehicle properly without rushing anything. Once it’s complete, I’ll give you a call. Still the best number?”

BOSS 8 — “Can I Get a Parts and Labor Breakdown?”

Boss Battle — read it, drill it, beat it.

SCRIPT | The Exchange

Customer: “Can you break down parts and labor?”

You: “I can absolutely review the estimate with you.

Just to clarify, we’re not structured as a parts-and-labor shop. We’re structured around protection and execution.

You’re paying for certified technicians, proper procedures, warranty coverage, and post-repair support not just the components themselves.

We also include:

- 3-year / 36,000-mile nationwide warranty
- Roadside assistance
- Quality control inspection
- Digital documentation

That’s why it doesn’t break down into a simple commodity model.

Does that help clarify where the value is?”

PSYCHOLOGY DECODER | Don’t Trade Apples for Apples

Once you let the customer compare your line items to a competitor’s line items, you have lost. You sell a complete protection program, not parts and minutes. Keep the conversation in that frame.

MASTERY CHECK | LEVEL 4 — BOSS RUSH MASTERY

- ☐ Boss 1 — Selling the Car
- ☐ Boss 2 — Price Too High
- ☐ Boss 3 — No Money Right Now
- ☐ Boss 4 — Talk to Spouse
- ☐ Boss 5 — I'm Going to Wait
- ☐ Boss 6 — You're Always Selling
- ☐ Boss 7 — I Need My Car Today
- ☐ Boss 8 — Parts and Labor Breakdown

Defeat all 8 in live calls within 30 days → Level 4 cleared. You are now a PRO.

LEVEL 5 — THE L.A.S.T. METHOD

Mission: Turn complaints into loyalty.

L.A.S.T. is your recovery combo for customer concerns. Use it when something has gone wrong—a missed call, a delayed repair, a billing surprise, a hot customer at the counter. Done well, an upset customer often becomes your most loyal one.

L — Listen

Let the customer speak without interrupting.

SCRIPT | Script cues

"I understand."

"Okay."

"Go ahead, I'm listening."

Don't defend. Don't explain yet. Just listen.

A — Acknowledge

Show you understand how they feel (even if you disagree).

SCRIPT | Script examples

"I can understand why that would be frustrating."

"I see why you'd be concerned about that."

"Thank you for bringing this to our attention."

This is about *emotion*, not fault.

S — Solve

Take ownership and offer a clear next step.

SCRIPT | Script examples

"Here's what I can do for you..."

"Let me take care of this for you."

"The next step will be..."

Be specific. No vague promises.

T — Thank

End by appreciating them.

SCRIPT | Script examples

"Thank you for your patience."

"Thank you for giving us the opportunity to fix this."

"We appreciate you choosing the Tire Pros today."

PSYCHOLOGY DECODER | Why L.A.S.T. Builds Loyalty

A customer who complains and is heard becomes more loyal than one who never had a problem at all. The act of being acknowledged in distress creates a bond stronger than a smooth transaction. L.A.S.T. is a recovery combo, not damage control.

DRILL | Hot Counter Roleplay

Pair up (or use the AI). One person plays an upset customer with one of these complaints:

12. "My car's been here for two days and no one called me."
13. "The bill is way more than what you quoted."
14. "I just paid for this last month and the same noise is back!"
15. "Your tech left grease on my seat."

Run L → A → S → T in order. Score: Did you wait? Did you acknowledge emotion before fact? Did you propose a specific next step? Did you thank them?

CERTIFICATION TRACKER

The road from Rookie to Champion. Sign as you go.

LEVEL	REQUIREMENT	SIGNED BY	DATE
Level 1 — ADVISOR	6/6 mastery checks across 3 inbound calls	Trainer	_____
Level 2 — TOUR GUIDE	8+ on three live shop tours under 90 sec	Trainer	_____
Level 3 — CLOSER	7/7 base-selling checks across 2 workflows	Manager	_____
Level 4 — PRO	All 8 Boss Battles defeated in 30 days	Manager	_____
Level 5 — CHAMPION	L.A.S.T. used on 3 real recoveries + positive review	Owner	_____

THE HAB OATH

I will assure customers they called the right place. I will earn the appointment instead of quoting blindly. I will run the bases in order. I will defeat the bosses with words, not arguments. I will $L \rightarrow A \rightarrow S \rightarrow T$ when things go wrong. And I will never forget—Integrity. Quality. Care.

APP MODULE MAP — For Developer Reference

This page maps the document to Replit app screens and AI roleplay scenarios.

Each callout type in this document maps to an app component:

SCRIPT → Read-along module. Advisor reads the script; app highlights the current line. AI scores pacing and tone keywords.

PSYCHOLOGY DECODER → Expandable insight card. Revealed after the advisor attempts the drill, so they earn the “why”.

DRILL → AI Roleplay scenario. The AI plays the customer. The advisor responds via voice or text. AI scores against the script and awards XP.

MASTERY CHECK → Gate quiz. Advisor must check off each item (manager co-signs in-app). Unlocks the next level.

STOP → Hard gate in the workflow. App prevents the advisor from skipping ahead.

MINI-BOSS / BOSS BATTLE → AI roleplay with scored objection handling. Random boss order. Leaderboard.

PRO TIP → Unlockable tip. Earned after passing the associated drill at 80%+ score.

AI Chatbot Persona

The AI roleplay bot should be configurable as:

16. Friendly first-timer (low resistance, asks basic questions)
17. Comparison shopper (medium resistance, has another quote)
18. Hostile repeat customer (high resistance, emotional)
19. Spouse on a three-way call (neutral, analytical)
20. Manager-mode (evaluates the advisor’s technique, gives coaching feedback)

All personas use the exact objection scripts from this document as their dialogue source.
