

HAB

HEALTHY AUTO BUSINESS

The Coach's Book

The Manager's Operating Manual for the HAB Sales OS

For: Service Managers, Coaches, Owners, and anyone responsible for installing the HAB Sales OS, running the weekly cadence, scoring ride-alongs, certifying advisors, and protecting the system from operational drift. This is your installation manual, scoring guide, and conversation handbook.

VERSION 1.3 · CONFIDENTIAL & PROPRIETARY

THE COACH'S OATH

I will praise the specific behavior, not the vague feeling.

I will correct in private, never in the bullpen.

I will coach the process and score the outcome.

I will protect my team's safety to try, fail, and try again.

I will hold the cadence even when the shop is on fire.

*I will measure my success not by what I do —
but by what they become.*

DO WHAT'S RIGHT · DO WHAT'S FAIR · DO YOUR BEST

COACH SIGNATURE

DATE

Table of Contents

— How To Use This Book

Ch 1 The Coach's Role — The Mindset Before the Mechanics

Six coaching principles, what coaches actually do, where coaching fails

Ch 2 The Foundation — What You Must Know to Coach

Core principle, 8 steps, Trust Triangle, Mastery Ladder — compressed reference

Ch 3 The 90-Day Implementation Plan

Stabilize (1-30) → Master (31-60) → Cement (61-90). Week-by-week runbook.

Ch 4 The Weekly Cadence That Makes It Work

Standup, drill, ride-along, audit, 1:1, scoreboard — daily and weekly

Ch 5 The Coach's Toolkit — How to Coach

SBI feedback, 5-beat conversation, calibration, psychological safety, hard conversations

Ch 6 Coaching by Module — What to Listen For

Coach's Corner for each of the 9 modules + red-flag patterns

Ch 7 The Shop KPI Dashboard

The 9 numbers, how to read them, what each one signals

Ch 8 The Train-the-Trainer Ladder

Building a backup coach so the system survives

App A Printable Ride-Along Scorecards

10 fillable scorecards — tear out, score, file

App B Calibration Drill Protocol

Monthly drill to align scoring across coaches

App C Difficult Conversations Playbook

The advisor who won't improve — 5-step script

App D Glossary

PREFACE

How to Use This Book

A great curriculum coached badly produces nothing. A modest curriculum coached well produces champions.

Your Position in the System

You are the single most important person in the HAB Sales OS. The curriculum can be the greatest in the world — if you don't run the cadence, score the ride-alongs, deliver SBI feedback, and protect the system from drift, it dies in a drawer. Your role is to convert a binder into behavior change, week after week, advisor after advisor.

Your Reading Plan

1. **Week 0:** Read Chapters 1, 2, and 5 cover-to-cover. Sign the Coach's Oath.
2. **Week 1:** Begin Phase 1 of the 90-Day Plan (Chapter 3). Read Chapter 4 on cadence and start running it.
3. **Ongoing:** Reference Chapter 6 (Coaching by Module) when you ride-along on a specific module. Use Appendix A scorecards daily. Re-read Chapter 5 quarterly to keep your own coaching sharp.

What You Should Have Within Arm's Reach

- **This book** — for coaching depth.
- **The Advisor Book** — so you can reference exactly what the advisors are learning.
- **The Pocket Card** — on your boom board.
- **The Shop KPI Scoreboard** — wall-mounted, color-coded, updated weekly.

The advisor controls behavior. You control whether they keep getting better at it.

CHAPTER 1

The Coach's Role

Mindset before mechanics. The six principles that govern every coaching interaction.

What a Coach Actually Does

A coach in this system is not a manager who happens to give feedback. A coach is a designer of behavior change. Three things, every week, without fail:

1. **Observes** — rides along, audits calls, scores against the scorecards.
2. **Reflects** — delivers SBI feedback (Situation · Behavior · Impact), one note per advisor per workday.
3. **Compounds** — holds the weekly cadence so improvement stacks week-over-week instead of resetting.

The Six Principles of Coaching at HAB

PRINCIPLE 1 Specific Beats Sincere "Great call" rewires nothing. "You held the pause for two seconds — Level-2 mastery" rewires fast.	PRINCIPLE 2 One Thing At a Time An advisor can consciously work on one new behavior per week. Pick the highest-leverage one. Park the rest.	PRINCIPLE 3 Behavior, Not Identity "You skipped Risk on that PRS" is coachable. "You're bad at PRS" is an identity attack.
PRINCIPLE 4 Praise Public, Correct Private Public praise multiplies. Public correction shuts the team down for a week. This is math, not soft policy.	PRINCIPLE 5 Coach Process, Score Outcome The advisor controls behavior, not whether a specific customer says yes. Coach the inputs. Score the outputs.	PRINCIPLE 6 Coach the Rare Skill Most coaches praise what comes easy. Praise the listening, the silence, the no-kitchen-sink discipline.

Where Coaching Fails (and How to Avoid It)

Failure Pattern	What's Happening	Fix
"I'm too busy to coach this week"	Operational fires win over development	Owner blocks coach's morning. Non-negotiable. SAs cover floor.
"Great job!" feedback only	No specific behavior named — nothing rewires	SBI structure on every note. No exceptions.
Correction in the bullpen	Team psychological safety crashes	Office, door closed. Always.
Same correction repeated weekly	Either it's not landing or you're stacking too many at once	One thing per week. Verify last week's stuck before adding new.
Promoting on tenure not evidence	Mastery Ladder becomes meaningless	Promote only on observable mastery checks. Document every gate.

CHAPTER 2

The Foundation

What you must know about the curriculum to coach against it.

The Core Principle

Sales is not persuasion. Sales is the systematic reduction of uncertainty.

The customer enters uncertain, fearful, defensive. They leave educated, confident, loyal. Every step in this system removes one specific kind of uncertainty. When you score an advisor, you're really scoring how cleanly they moved the customer along this arc.

The 8 Process Steps

#	Step	Uncertainty Removed	Primary KPI	Target
1	Rapport	"Are these people safe?"	Greet-to-Tour %	≥ 80%
2	Credibility	"Do they know what they're doing?"	Tour → DVI %	≥ 95%
3	Custody	"What's actually wrong?"	Inquiry → RO %	≥ 70%
4	Inspect	"How bad is it really?"	DVI w/ Media %	≥ 95%
5	Strategize	"Where do we start?"	Base Order %	≥ 90%
6	Present	"Why does this matter?"	Present → Auth %	≥ 70%
7	Objections	"Should I really do this?"	1st-Obj Close %	≥ 60%
8	Close	"What happens next?"	Authorization Rate	≥ 75%

The Invisible Scorecard

Every customer silently grades the advisor on three traits: **Competence, Transparency, Trustworthiness**. Score all three → price is irrelevant. Lose any one → price becomes the only conversation. *When you score a ride-along, mentally tag every advisor sentence with C, T, or Tw. Most under-performers over-index on Competence (bragging) and skip Transparency entirely.*

The Mastery Ladder

1	Rookie — reads scripts, no improvisation
2	Advisor — runs scripts naturally, concern vs. symptom, books without quoting
3	Closer — owns East-West, runs the bases, PRS by heart
4	Pro — defeats all 8 Bosses, re-opens missed sales
5	Champion — customers ask by name, trains others, owns culture

CHAPTER 3

The 90-Day Implementation Plan

Three 30-day phases. One dominant goal each. Don't skip Phase 1.

The Three Phases

Most shops that try to install a sales system fail at the same place: they try to install everything at once, the team gets overwhelmed inside two weeks, and the binder ends up in a drawer. This plan is deliberately sequenced. Each phase has a single dominant goal. The next phase does not begin until the current one is measurably won.

PHASE 1 · DAYS 1-30 STABILIZE Foundation + M1 + M2. Stop the biggest leaks: phone quoting and skipped shop tours.	PHASE 2 · DAYS 31-60 MASTER M3 through M8. Install custody, DVI, base selling, presentation, objections, close.	PHASE 3 · DAYS 61-90 CEMENT M9 + culture + first Champion promotion. Make the system self-sustaining.
---	---	---

Roles — Assign by Name on Day 1

Role	Owns	Daily Time	Single Most Important Behavior
Owner / GM	Scoreboard, removes blockers, defends the cadence	15-30 min	Show up to the Monday standup every week. Period.
Coach / SM	Drills, ride-alongs, 1:1s, calibration	1-2 hours	Audit ≥1 call per advisor per day. No skips.
Advisor	The reps, self-audit, mastery gate behaviors	20 min + reps	Self-audit worksheet every shift.

Phase 1 · Stabilize (Days 1-30)

Week	Curriculum	Drills	KPI Gate to Advance
1	Foundation chapter. Sign Oath. Baseline KPIs.	Trust Triangle whiteboard. Greet-to-tour baseline.	Baselines documented. Oath signed. Roles posted.
2	Module 1 (Rapport)	Smile-Through-Voice, The Pause, Name × 3	2-Ring Compliance ≥ 95%. Greet-to-Tour improving.
3	Module 2 (Credibility)	90-Second Tour drill, every advisor walked once	Tour Delivery = 100%. Tour → DVI ≥ 90%.
4	Mastery certification M1 + M2	Boss preview (B1, B2 only)	All advisors Level 2 (Tour Guide). Phase 1 KPIs Green.

STOP Do NOT advance to Phase 2 until every Phase-1 KPI is Green for two consecutive weeks.

The single most common failure of this rollout is sprinting through Phase 1 to "get to the good stuff." There is no good stuff if Rapport and Credibility aren't locked.

Phase 2 · Master (Days 31-60)

Week	Curriculum	Drills	KPI Gate
5	M3 (Custody) + M4 (Inspect)	Concern vs. Symptom translation. DVI media audit (2/advisor/day).	Inquiry-to-RO $\geq$ 70%. DVI w/ Media $\geq$ 95%.
6	M5 (Strategize) — the Diamond	Base-order drill on every call. Anti-kitchen-sink intervention.	Base-Order Compliance $\geq$ 90%.
7	M6 (Present) + Water Pump example	PRS-on-every-finding drill. Investment-then-Coverage no-pause drill.	Present $\rightarrow$ Auth $\geq$ 65%. PRS Completeness = 100%.
8	M7 (Objections) + M8 (Close)	Daily Boss Rush. Direction-Facing close drilled.	1st-Objection Close $\geq$ 55%. All 8 Bosses defeated live.

PRO TIP Run Boss Rush every single morning of Phase 2.

15 minutes, all hands, standing. By Week 8 the team will have heard every Boss 40+ times in drill and will counter in their sleep. Highest-leverage Phase-2 ritual.

Phase 3 · Cement (Days 61-90)

Week	Curriculum	Drills	KPI Gate
9	M9 (L.A.S.T. Recovery)	Silence Tolerance, BUT Buster. Walk every recent complaint through Mastery Check.	Time-to-Acknowledge $\leq$ 1 hr. Zero use of "policy."
10	Full-workflow integration	One ride-along per advisor. Same-day coaching note.	Every advisor 3+/5 on all 8 steps. Auth Rate $\geq$ 75%.
11	Level 4 (Pro) certifications	Boss Rush final exam. Recovery final exam.	$\geq$ 50% advisors at Level 4. Top candidate for Level 5.
12	Culture cementing. First Champion.	Champion gets visible recognition. Team retrospective.	Day-90 KPIs beat Day-1 on every metric.

Day-90 Graduation Checklist

You've installed the system when all 8 of these are true on Day 90:

1. Every advisor is at Level 2+; at least half are at Level 4.
2. At least one advisor is on track for Level 5 (Champion) within 30 days.
3. All 9 KPIs beat their Day-1 baseline; at least 6 of 9 are Green.
4. Daily drill, weekly standup, weekly 1:1s, weekly ride-alongs have run unbroken for 12 weeks.
5. Every advisor delivers the shop tour, PRS, and L.A.S.T. from memory.
6. You can name, for each advisor, exactly which step (1-8) is their next growth area.
7. The HAB Oath is recited weekly, posted visibly, signed by every advisor.
8. One complaint has been recovered well enough to produce a 5-star review.

CHAPTER 4

The Weekly Cadence

A great curriculum without a cadence is just a binder. Defend this rhythm like payroll.

The Weekly Beat

When	Who	Ritual	Output	Time
Mon AM	All hands	Standup. Last week's KPIs. This week's focus metric.	Weekly focus on board.	20 min
Daily AM	All hands	15-min drill (phase-appropriate).	Score logged.	15 min
Daily	Coach	Audit 1+ call per advisor.	One SBI note per advisor.	30-45 min
Wed	Coach	One full ride-along with scorecard.	Scored ride-along sheet.	45 min
End of Shift	Advisor	Self-audit worksheet.	Filed with shift report.	2 min
Fri PM	Coach + each advisor	15-min 1:1.	1:1 doc updated.	15 min × team
Fri PM	Owner	Update KPI scoreboard.	Green/Yellow/Red posted.	15 min

The Drill Calendar — What to Drill When

Phase	Daily Drill Focus	Why
Phase 1	The Tour Drill (Module 2)	Stops the biggest leak: skipped tours.
Phase 2	Boss Rush (rotate all 8)	Builds objection reflexes through repetition.
Phase 3	Recovery Roleplay (Module 9)	Installs L.A.S.T. as instinct, not procedure.
Post-Day-90	Random module rotation	Prevents drift on any single step.

The Coach's Own Daily Routine

1	7:30 AM — Review yesterday's KPIs and ride-along notes. Pick today's focus.
2	8:00 AM — Lead daily drill (15 min).
3	9:00 AM — Audit 1-2 calls from yesterday. Write SBI notes.
4	Mid-Day — Ride along with 1 advisor on a live workflow (Wed only).
5	4:30 PM — Walk the bay. Praise specific behaviors observed today.
6	5:00 PM — Friday: 15-min 1:1s with each advisor. Other days: log notes for tomorrow.

STOP If the cadence breaks for 2+ weeks, the install dies.

This is not soft. The cadence IS the install. Every shop that has failed to make HAB Sales OS stick failed at the cadence first. If operations are pulling you off coaching duties consistently, that is a structural conversation with the owner — not a personal failure.

CHAPTER 5

The Coach's Toolkit

How to coach — not just what to coach.

The SBI Framework — The Coaching Sentence That Always Works

Every coaching note, every 1:1, every ride-along debrief uses the same three-part structure: **Situation • Behavior • Impact**. Use it for praise. Use it for correction. The structure removes ambiguity and protects the relationship.

Figure 5.1 · SBI — the three-part sentence that makes every coaching note useful

SBI in Practice — Praise vs. Correction

Type	VAGUE (don't)	SBI (do)
Praise	"Great call!"	"On the 11am call (S), you said the investment number and went immediately into the warranty without pausing (B). The customer didn't flinch and authorized in the next breath (I). That's the Level-3 close I've been looking for."
Correction	"You need to do better on objections."	"On the 2pm spouse-objection call (S), you went straight to discounting instead of offering the three-way call (B). That sets a precedent that complaining gets discounts, and it killed our chance to talk to the actual decision-maker (I). Let's drill Boss 4 together this afternoon."

The Five-Beat Coaching Conversation

Every 1:1 and every post-ride-along debrief runs on the same five-beat structure. Scales from a 5-minute hot debrief to a full 30-minute quarterly check-in. The order matters — especially Beats 1 and 5.

Beat	What	Sample Words	Time
1	Open with Trust. No agenda.	"How's your week going?"	2 min
2	Praise (SBI). One specific behavior.	"On Tuesday's call you..."	2 min
3	One Correction (SBI). Get advisor's read first.	"Walk me through how that call landed for you..."	4 min
4	Commit to One Behavior. By next 1:1.	"Next week, on every PRS, you'll..."	2 min
5	Close with Belief. Tell them you see their next level.	"You're one cycle away from Pro."	2 min

PRO TIP Get the advisor's read **BEFORE** you give yours.

In Beat 3, always ask the advisor what they thought of the call/behavior before you offer your view. They often already know what went wrong — so you're reinforcing self-coaching, not lecturing — and they hear correction from themselves far better than from you.

Psychological Safety — The Coaching Substrate

Advisors won't surface mistakes, ask for help, or try new behaviors if they fear being shamed. Maintain the conditions under which advisors are willing to be imperfect.

Builds Safety	Destroys Safety
Coach admits their own past mistakes openly	Coach names other advisors' mistakes in front of team
Correction in private, paired with belief	Correction in the bullpen for team to overhear
"What were you trying to do?" before "here's what I saw"	"Why did you..." (puts advisor on defense)
Praise the experiment, even when it failed	Punish every miss equally regardless of intent
One coachable thing per 1:1	Dump every backlog item into one conversation

Calibration — Making "Mastery" Mean the Same Thing Across Coaches

CALIBRATION DRILL Monthly, mandatory for multi-coach shops.

Setup: Pick three recorded calls (one great, one middle, one weak). All coaches score independently with the Ride-Along Scorecard.

Reveal: Read scores aloud. Where the spread is > 1 point, discuss the specific moment that drove the variance. Agree on a shared rubric.

Outcome: Within 3 months, inter-coach variance should drop below 0.5 points. That's when promotions become trustworthy.

The Coach's Own KPIs

AVG LEVEL CHANGE / QTR	NOTES / WEEK	CALIBRATION VARIANCE
≥ 0.5 Across the team, average mastery rises 0.5+ levels per quarter.	5 × team One SBI note per advisor per workday.	< 0.5 pts Multi-coach: agreement on scored calls.

CHAPTER 6

Coaching by Module

What to listen for, what to praise, what to correct — module by module.

Module 1 — Rapport

LISTEN FOR (IN ORDER)

(1) the smile in the voice on hello · (2) the pause · (3) the relief line · (4) the name use · (5) no price quoted.

Praise specifically. "You held the pause for a full two seconds — that's a Level-2 move."

Correct one channel at a time. If tone and body are both broken, fix tone first — highest leverage, least ego-loaded.

Red flag: if greet-to-tour rate drops below 60%, the leak is in Rapport, not Pricing.

Module 2 — Credibility

SCORE THE TOUR WITH THE TRUST TRIANGLE IN HAND

Walk along on one tour per advisor per week. For each sentence delivered, silently tag it C / T / Tw in your notebook.

After the tour, show them the tally. Most under-performers over-index on Competence (bragging) and skip Transparency entirely. Once they see the imbalance, it self-corrects in two weeks.

Module 3 — Custody

AUDIT ONE RO PER ADVISOR PER DAY

Pick one finished RO. Read the documented concern as if you were the tech walking into the bay cold. If you cannot reproduce the customer's symptom from the writing alone, custody discipline broke down. Have the advisor re-do that intake aloud with you. Don't scold — rehearse.

Module 4 — Inspect

AUDIT TWO DVIS PER ADVISOR PER WEEK

Open the DVI as if you were the customer. Could you understand the finding from the photos and notes alone? Is any finding missing media? Most failures here are caught and corrected inside one cycle.

Module 5 — Strategize / Base Selling

LISTEN FOR THE "EVERYTHING" CALL

Pull one recorded call per advisor per week. If they presented more than one base in a single call, flag it. Replay together. Have them re-script it as separate base calls. This single intervention has driven the most close-rate improvement of any coaching move in the playbook.

Module 6 — Present

SCORE ONE PRESENTATION PER ADVISOR PER WEEK

Use the Water Pump 10-beat anatomy as your scorecard. For each numbered beat, mark Present / Partial / Missing. Coach the missing items one at a time. The most common gaps: skipping Risk (beat 7) and pausing between Investment (8) and Coverage (9).

Module 7 — Objections

WEEKLY BOSS RUSH

15-minute team standup. You throw random Boss lines. Advisors counter in turn, no notes. Score 1-3 per counter. Track who has cleared all eight in live calls within 30 days. Post the leaderboard. Fastest path to Level 4 (PRO).

Module 8 — Close

PRAISE THE DIRECTION-FACING CLOSE BY NAME

This single line is one of the most quietly powerful closes in the system. When you hear it land, name it specifically: "That direction-facing close on the 3pm pickup — perfect execution. They didn't even ask about the bill." Naming the technique makes it more likely to be repeated.

Module 9 — L.A.S.T. Recovery

AUDIT EVERY RECOVERY WITHIN 48 HOURS

The protocol: any time an advisor handles a complaint, you have 48 hours to walk through the interaction with them. Not punitive. Coaching. Use the Mastery Check as the scorecard. Praise the listen, not the solve — that's the skill 95% of advisors get wrong.

Personally call the recovered customer 5-7 days later. Confirm satisfaction. Ask for the review. Recovered customers leave the best reviews you'll get.

Red-Flag Behaviors — Stop the Drift Early

Red Flag	Predicts	Intervention
Quoting on phone	Crashed appt rate in 30 days	Re-run Module 1 drills.
Skipping shop tour	Price objections triple	Module 2 ride-along.
DVI without media	Auth rate drops 15-25%	Tech-advisor walk-the-bay reset.
Skipping Risk in PRS	"Let me think about it" standard	Module 5/6 PRS drill.
Pausing after Investment	Sticker shock takes over	Module 6 muscle-memory drill.
Arguing with objections	Customer never returns	Boss Rush + acknowledgment drill.
Same-call kitchen-sinking	Auth rate halves	Module 5 anti-kitchen-sink intervention.

CHAPTER 7

The Shop KPI Dashboard

9 numbers. Wall-mounted. Color-coded. Updated weekly. Defended like payroll.

The 9 Numbers That Run the Shop

These are the only numbers an owner needs to track to know the system is working. If any metric goes Red two weeks in a row, the coach's focus for the next week is automatically that metric.

INQUIRY → APPT % ≥ 65% M1 leak indicator	TOUR DELIVERY % 100% M2 discipline	DVI W/ MEDIA % ≥ 95% M4 quality gate
PRS COMPLETENESS 100% M5/M6 discipline	1ST-OBJ CLOSE % ≥ 60% M7 mastery	AUTH RATE ≥ 75% M8 outcome
RECOVERED % ≥ 25% Short-Stop effectiveness	ARO shop benchmark Per-advisor variance flag	5-STAR % ≥ 80% Trust outcome scoreboard

How to Read the Dashboard

Pattern	What It Means	Action
All Green for 4+ weeks	System is locked in	Move to compounding mode. Promote.
Inquiry → Appt drops, others stable	Rapport is leaking	Pull 5 phone recordings. Re-drill M1.
Auth Rate drops, Present → Auth stable	Volume issue, not skill issue	Check Inquiry → Appt upstream.
Recovered % drops to zero	Complaints aren't being escalated	Check capture process. Audit.
One advisor's ARO << team avg	That advisor's skill gap is specific	Ride-along. Identify which step.

Per-Advisor Tracking (your own personal record per advisor)

For each advisor on your team, maintain a one-page tracker like the worksheet below. Update weekly.

ADVISOR DEVELOPMENT TRACKER

Advisor name:	_____
Current level:	_____
Hire / start date:	_____
Next level target:	_____
One growth area (Module #):	_____
This week's KPIs:	_____
Wins to praise:	_____
Pattern to correct:	_____
Last 1:1 commitment:	_____
Promotion gate signed:	_____

CHAPTER 8

The Train-the-Trainer Ladder

Build a backup coach. The system must survive a coach getting hit by a bus — or promoted, or pulled away.

The single biggest risk to HAB Sales OS at any shop is "the coach got pulled into operations." Inside Phase 3 of the rollout, begin developing a second coach. Inside the first year, every shop should have a backup who can run the full cadence solo for two weeks.

Stage	Backup Coach Does	Lead Coach Does
Month 1	Shadows every drill, ride-along, 1:1	Runs everything. Explains the "why" after each session.
Month 2	Co-runs daily drill. Co-scores ride-alongs. Weekly calibration.	Hands off drill leadership. Audits scoring.
Month 3	Owens 50% of 1:1s. Owns daily drill solo.	Owens other 50%. Reviews backup's coaching notes.
Month 4+	Runs solo for one full week (lead is "away").	Reviews KPIs end of week. Course-corrects if needed.

BACKUP COACH READY WHEN...

They can independently: run a Monday standup, lead a Boss Rush drill, score a full ride-along, deliver SBI feedback in both praise and correction modes, run a 15-minute 1:1, and update the KPI scoreboard. AND the system runs unbroken for one full week without the lead coach present.

APPENDIX A

Printable Ride-Along Scorecards

Tear out, score, file. Use one per advisor per week.

The scorecard below is the operational tool for Wednesday ride-alongs. Print this appendix in bulk — budget ~52 scorecards per advisor per year (one per week). File completed scorecards in each advisor's development folder.

RIDE-ALONG SCORECARD — ONE PER ADVISOR PER WEEK

Advisor: _____

Date / Shift: _____

Workflow observed (RO #): _____

Coach: _____

SCORE EACH 1–5 (5 = MASTERY)

Step 1 — Rapport: _____

Step 2 — Credibility / Tour: _____

Step 3 — Custody / Concern doc: _____

Step 4 — DVI quality: _____

Step 5 — Base order / no kitchen-sink: _____

Step 6 — PRS + Investment/Coverage flow: _____

Step 7 — Objection counters: _____

Step 8 — Close (assumptive, direction-facing): _____

Total / 40: _____

SBI DEBRIEF

Specific praise (Situation · Behavior · Impact): _____

Specific correction (S · B · I): _____

Behavior advisor commits to: _____

Re-audit date: _____

Advisor signature: _____

Coach signature: _____

PHOTOCOPY THIS PAGE AS NEEDED · FILE IN ADVISOR'S DEVELOPMENT FOLDER

APPENDIX B

Calibration Drill Protocol

Monthly. For shops with more than one coach. Trust gate for promotions.

The Setup (30 minutes, monthly)

- 1 **Coach 1 selects 3 recorded calls** in advance — one strong (8-10/10), one middle (5-7/10), one weak (1-4/10). Coach 1 does not reveal own scores.
- 2 **All coaches gather.** Play each call. Each coach scores independently using the Ride-Along Scorecard.
- 3 **Reveal.** Each coach reads their score for each step. Tabulate.
- 4 **Discuss every variance > 1 point.** The coach with the higher score explains what they observed. The coach with the lower score explains what they observed. Agree on a shared standard for that specific behavior.
- 5 **Document the agreed standard.** Add to a Calibration Log so the next drill builds on it.

The Variance Target

TARGET Inter-coach variance < 0.5 points within 3 months.

If your coaches are scoring the same call as 4/5 vs. 2/5, your promotions feel arbitrary to the team, which means trust in the system erodes. Calibration is the unsexy work that makes the mastery ladder legitimate.

The Calibration Log Template

CALIBRATION LOG ENTRY

Date: _____

Calls scored: _____

Largest variance (step / spread): _____

Behavior in question: _____

Agreed standard (what counts as 5, 3, 1): _____

Coaches present: _____

Next drill date: _____

APPENDIX C

The Difficult Conversation Playbook

The advisor who attends drills, nods along, and changes nothing.

Every coach faces this. It is not a coaching problem — it is a clarity problem. Run this conversation, in this order, exactly once. If improvement doesn't follow, the next conversation is about role fit.

- 1 **Name the pattern, not the person.** "Over the last three weeks, I've scored PRS Completeness at 60%, 55%, 50%. That's a trend, and it's gone the wrong direction."
- 2 **Ask what's in the way.** "What's making this hard?" Then listen for 30 seconds without interrupting. Sometimes it's a personal issue, a tool problem, or a misunderstanding of the standard.
- 3 **Make the standard explicit and observable.** "The standard is 100% PRS on every finding. Here's what that looks like in practice. Show me what gets in the way of that on the next three calls."
- 4 **Set a clear 30-day improvement gate.** "In 30 days, the metric needs to be Green for two consecutive weeks. Here's the support I'll provide: [drills, ride-alongs, 1:1 cadence]. Here's what happens if it doesn't: [next step in your process]."
- 5 **Document, then follow through.** Either they improve — in which case you praise the climb out — or they don't, in which case the conversation you've already had becomes the foundation for the next step. Coaching that has no consequence isn't coaching — it's wishing.

STOP Never have this conversation in the bullpen.

Office with the door closed, or off-site if necessary. Public versions are humiliating for the advisor, terrifying for the team, and destroy psychological safety across the whole shop.

Documentation Template

DIFFICULT CONVERSATION — DOCUMENTED

Date: _____

Advisor: _____

Pattern named: _____

KPIs / behaviors cited: _____

Advisor's stated reason / blocker: _____

Explicit standard agreed: _____

30-day gate (specific KPI target): _____

Support coach will provide: _____

Consequence if gate not met: _____

Next check-in date: _____

Coach signature: _____

Advisor signature: _____

APPENDIX D

Glossary

Coach quick reference. Every named technique in one place.

Curriculum Terms

East-West Scheduling	Two specific times (one :15 after, one :45 before). Binary choice.
The Relief Line	"You called the right place." Limbic relief in 10 sec.
90-Second Friendship Window	First impression locks in 90 seconds.
Concern vs. Symptom	Customers describe symptoms; pros diagnose concerns.
Custody	The car in our bay. Gate to every other objective.
Invisible Scorecard	Competence + Transparency + Trustworthiness.
Trust Triangle	Visual of the Invisible Scorecard.
Co-Review	"I personally reviewed with the tech" — scores Comp + Tw.
Vehicle Health Dashboard	Green/Yellow/Red sort of DVI findings.
Good-Good-Bad	Two positives before the third (finding/cost).
PRS	Problem · Risk · Solution. Risk = urgency engine.
Base Selling (Diamond)	1st → 2nd → Short Stop → 3rd → Home.
10-Step ISO	Canonical presentation structure.
Kitchen-Sinking	Anti-pattern: mixing bases on one call.
Assumptive Close	Skip the decision, move to logistics.
Direction-Facing Close	"Which direction would you like the vehicle facing?"
L.A.S.T.	Listen-Acknowledge-Solve-Thank. Recovery combo.
Service Recovery Paradox	Well-recovered customer = more loyal than baseline.

Coach Terms

SBI	Situation · Behavior · Impact. The coaching sentence.
5-Beat Coaching Conversation	Open Trust → Praise → Correct → Commit → Close with Belief.
Calibration	Monthly drill to align inter-coach scoring.
Boss Rush	Daily team drill — random Boss objections, scored counters.
Ride-Along Scorecard	Weekly per-advisor 8-step scoring sheet.
Coach's Oath	Public commitment. Specific praise, private correct, process not outcome.
