HAB Script Book

Clean Scripts for Roleplay & Memorization

Scripts only. No psychology, no callouts, no interruptions — just the exact words, with speakers labeled, one script per page. Use this book at the counter, in morning roleplay, and for memorization reps. The teaching behind every script lives in the HAB Advisor Book.

The one rule above every script: the goal of every inbound call is to get the car into the shop. Book the appointment. The sales process (secure the appointment) leads; the sales objectives (rapport, credibility, education) are earned through and after the close. The scripts serve the booking — never the other way around.

VERSION 3.7 · CONFIDENTIAL & PROPRIETARY

DO WHAT'S RIGHT · DO WHAT'S FAIR · DO YOUR BEST

What's New Since Version 1

Your shop received Version 1 of this book. This edition replaces it. Here is everything that has changed, in plain language. Where this book and your memory of the old scripts disagree, this book wins.

The Quick Close now opens every inbound call. The call opens by answering the customer's question and closing for the visit in the same breath: "Absolutely, you've called the right place. Is now a good time to bring your vehicle in?" There is no shop introduction until the appointment is secured. If they can't come now, East-West scheduling offers two specific times.

The full inbound call ships in two versions. Version 1 for the customer who asks directly (answer and close immediately) and Version 2 for the price or quote inquiry (concern question, urgency line, no-charge line, then the close). Concern Discovery is a trained checkpoint on every rep.

Say Yes, Get Them In — No Pre-Education. The phone call has one job: say yes and get the vehicle in the door. Questions, urgency, and value framing are allowed. Warnings and caveats about whether the requested service will fix the problem are banned until the inspection produces evidence. Never say "not just [what they asked for]," and never justify the no-charge line — it stands on its own. The price barrier is met first with the warm "Oh, no no" beat.

Value is stated affirmatively — in every script. The "not just [what they asked for]" construction is banned in all customer-facing dialogue, in every script and every boss battle, not only on the phone. In the customer's mind "not just X" negates their request and hints at extra, and extra means extra cost. Every script states the value directly instead.

The Root Concern Rule. Even when the customer names a service and says yes, the advisor finds the TRUE root concern before writing the job — with questions, never with warnings.

The Keys Moment and the Audible. Intake was rebuilt. The real shop tour happens on the walk in (the inspection-rack line), and the waiting-area offer is replaced by the keys moment: "And you're dropping this off with me, right?" If the customer plans to wait, the audible surfaces the single most critical safety concern and shows it in person.

The DVI Timing Rule. Never book the appointment with the inspection — book with the customer's concern. The inspection is presented only after the concern is addressed or the first approval is secured, wrapped inside a waiting window.

The ISO total's "including" points backward. The investment line may reference only work the customer has already approved ("including the oil service you already approved"), never the repair being presented.

Reassurance opens on second and third base. Follow-up calls open by confirming the approved work is already moving, and everything new is labeled "additional." First base closes by acknowledging the yes, assuming the sale, and introducing the bumper to bumper inspection naturally.

Boss Battle 9 — The Second Opinion. The eight Boss Battles are now nine. The new battle counters "I want a second opinion / I can get it done cheaper" with the Honest Disarm, the Short Stop live play (the Short Stop reinforces the advisor first and never contradicts him), the Repair Plan, and the Customer-for-Life Close — with a full worked example.

Clean scripts only, one per page. This book is the roleplay companion: labeled speakers, no teaching interruptions. All of the psychology and coaching behind these scripts lives in the HAB Advisor Book.

Contents

1	The Full Inbound Call — Version 1 · Customer Ready (Direct Ask)
2	The Full Inbound Call — Version 2 · Price / Quote Inquiry
3	The "When Is Now a Good Time" Quick Close + Branches
4	The Root Concern Rule — Self-Diagnosis Defense
5	The Four Inbound Mini-Bosses (Price Counters)
6	The Approach + The Shop Tour
7	Custody — The Arrival & Intake
8	The PRS Write-Up Verbal (First Base Call)
9	The 10-Step ISO Presentation (Water Pump)
10	Second Base — Additional Findings Call
11	Third Base — Scheduled Maintenance Call
12	Boss Battle 1 — "I'm Selling the Car"
13	Boss Battle 2 — "The Price Is Too High"
14	Boss Battle 3 — "I Don't Have the Money Right Now"
15	Boss Battle 4 — "I Need to Talk to My Spouse"
16	Boss Battle 5 — "I'm Going to Wait"
17	Boss Battle 6 — "You're Always Trying to Sell Me"
18	Boss Battle 7 — "I Need My Car Today"
19	Boss Battle 8 — "Can I Get a Parts and Labor Breakdown?"
20	Boss Battle 9 — "I Want a Second Opinion / I Can Get It Done Cheaper"
21	Boss Battle 9 Worked Example — The Full Engine Reseal Repair Plan
22	L.A.S.T. Recovery — The Four Hot Counters
23	The Re-Open Calls — Short Stop & Manager Follow-Up
24	Home Plate — Booking the Next Visit

Roleplay rules: One partner reads Customer, one reads Advisor. Swap roles every rep. Read at conversation pace, not reading pace. Stage directions in [brackets] are performed, not spoken. Bracketed placeholders like [Shop] and [Customer Name] get filled with real words, out loud, every time.

Trained checkpoint — Concern Discovery: in every inbound rep, the advisor must be able to state the customer's true concern in the customer's own words before the call ends. If you can't state it, you ask for it. The checkpoint is marked inside the scripts where it must happen.

Say Yes, Get Them In — No Pre-Education: the inbound call has ONE job: say yes to the customer and get them in the door. Questions are allowed. Urgency is allowed. Value framing is allowed ("at no cost to you, my certified technician and I will inspect your complete oil system and provide you a complete written estimate"). Never say "not just [what they asked for]" — and the ban is universal: the "not just X" construction is banned in ALL customer-facing dialogue, in every script in this book, because it subliminally tells the customer no, insinuates extra, and extra means extra cost. State the value affirmatively instead. The no-charge line needs no justification. Warnings, caveats, and education about whether the customer's requested fix will work are banned until the vehicle is in and the inspection produces evidence. The customer hangs up thinking "yes, I'm getting my oil change done."

The Full Inbound Call — Version 1 · Customer Ready (Direct Ask)

The customer asks directly for a service. Answer the question, close for the visit immediately, then branch. Never quote a price on the phone.

[Pick up before the third ring. Smile before you speak.]

Advisor: "Thank you for calling [Shop]. My name is [Your Name]." *[Pause. Let the customer speak.]*

Customer: "Hi, do you work on brakes?"

Advisor: "Absolutely, you've called the right place. Is now a good time to bring your vehicle in?"

Customer: "Yeah, I can head over now."

Advisor: "Great, have you been with us before?"

BRANCH A · FIRST-TIME CUSTOMER

Customer: "No, this will be my first time."

Advisor: "Thank you so much for choosing us! We are [Shop], your certified dealer alternative, located at [address], open six days a week from [store hours]. We have ASE and dealer-certified technicians ready to handle all of your vehicle needs, from tires and service to major repairs. We stand behind our work with warranties up to 3 years or 36,000 miles. We also offer complimentary shuttles, vehicle pick-up and drop-off, ride services, rental car reimbursement, and loaner vehicles when available! Stay with me really quick while I gather your information to build a customer profile."

[Gather name, number, email, vehicle year, make, and model.]

Advisor: "And so I can point our technician at exactly the right thing, what kind of concern are you having with your brakes?"

Customer: "They squeak when I stop."

Advisor: "Oh my goodness, when you have a squeak coming from your brake system, you've got to have it inspected by one of our ASE-certified technicians, so I'm glad you're coming in. Perfect, [Customer Name], you're all set. We'll see you and your vehicle shortly!"

✓ **TRAINED CHECKPOINT · CONCERN DISCOVERY — CONCERN CAPTURED IN THE CUSTOMER'S OWN WORDS BEFORE THE CALL ENDS.**

BRANCH B · RETURNING CUSTOMER

Customer: "Yes, I've been in before."

Advisor: "Welcome back! Is this still the best number for you?"

Customer: "Yes it is."

Advisor: "Perfect, I have your profile pulled up. Since your last visit, [brief shop news: a new certification, new equipment, a new team member, or what's new around the shop]. What kind of concern are you having with your brakes?"

Customer: "They squeak when I stop."

Advisor: "Oh my goodness, when you have a squeak coming from your brake system, you've got to have it inspected by one of our ASE-certified technicians. We'll get that handled. We'll see you and your vehicle shortly!"

[Customers visit only 2 to 4 times a year; the shop-news update re-syncs the rapport.]

BRANCH D · CAN'T COME NOW

Customer: "I can't come in right now."

Advisor: "Okay, no worries. I've got 11:15 or 2:15 open today. Which works best for you?"

Customer: "2:15 works."

Advisor: "Perfect, [Customer Name], you're set for 2:15. What kind of concern are you having with your brakes?"

Customer: "They squeak when I stop."

Advisor: "Oh my goodness, when you have a squeak coming from your brake system, you've got to have it inspected by one of our ASE-certified technicians, so I'm glad we've got you in at 2:15. We'll see you and your vehicle then!"

[First-time: run the Branch A introduction and build the profile. Returning: confirm the number and share the shop news.]

The Full Inbound Call — Version 2 · Price / Quote Inquiry

The request is vague or a quote. Ask for the concern, amplify the urgency, THEN close. The concern feeds the urgency; the urgency feeds the close. Never quote a price on the phone.

[Pick up before the third ring. Smile before you speak.]

Advisor: "Thank you for calling [Shop]. My name is [Your Name]." *[Pause. Let the customer speak.]*

Customer: "Hi, I was hoping to get a quote on some brakes."

Advisor: "Yeah, absolutely, you've called the right place. What kind of concern are you having with your brakes?"

Customer: "They're squeaking when I drive."

Advisor: "Oh my goodness, when you have a squeak coming from your brake system, you've got to bring it in and have it inspected by one of our ASE-certified technicians. Is now a good time to bring it in?"

✓ TRAINED CHECKPOINT · CONCERN DISCOVERY — THE CONCERN QUESTION COMES BEFORE THE CLOSE ON EVERY VAGUE OR QUOTE CALL.

IF THE CUSTOMER PUSHES FOR A PRICE

Customer: "Well, how much is it going to cost?"

Advisor: "At no charge to you, my certified technician AND I will inspect your complete brake system and provide you a written estimate. Is now a good time to bring it in?"

Customer: "Okay, yeah, I can come in now."

Advisor: "Great, have you been with us before?"

[Carry on with the full inbound call: first-time introduction and profile, or best-number check and shop news for a returning customer. The concern is already documented.]

IF THE CUSTOMER CAN'T COME NOW

Customer: "I can't come in right now."

Advisor: "Okay, no worries. With that squeak coming from your brake system, we don't want to leave it unchecked long. I've got 11:15 or 2:15 open today. Which works best for you?"

Customer: "2:15 works."

Advisor: "Perfect, [Customer Name], you're set for 2:15. We'll see you and your vehicle then!"

[First-time: run the introduction and build the profile. Returning: confirm the number and share the shop news.]

The "When Is Now a Good Time" Quick Close + Branches

This IS the opening of the inbound call, not a variation. Direct ask: answer and close. Vague or quote ask: concern question, urgency line, then close.

Customer: "Hi, do you work on brakes?"

Advisor: "Absolutely, you've called the right place. Is now a good time to bring your vehicle in?"

Customer: "Yeah, I can head over now."

Advisor: "Great, have you been with us before?"

BRANCH A · FIRST-TIME CUSTOMER

Customer: "No, this will be my first time."

Advisor: "Thank you so much for choosing us! We are [Shop], your certified dealer alternative, located at [address]. We have ASE and dealer-certified technicians ready to handle all of your vehicle needs, and we stand behind our work with warranties up to 3 years or 36,000 miles. Stay with me really quick while I gather your information to build a customer profile. What's the year, make, and model of your vehicle?"

[Build the profile. Ask the concern question and document the answer. Confirm the arrival time. You are now inside the full inbound call script.]

Advisor: "Perfect, [Customer Name], we'll see you and your vehicle shortly!"

BRANCH B · RETURNING CUSTOMER

Customer: "Yes, I've been in before."

Advisor: "Welcome back! Is this still the best number for you?"

Customer: "Yes it is."

Advisor: "Perfect, I have your profile pulled up. Since your last visit, [brief shop news: a new certification, new equipment, a new team member, or what's new around the shop]. We'll see you and your vehicle shortly!"

[Ask the concern question and document the answer. Customers visit only 2 to 4 times a year; the shop-news update re-syncs the rapport.]

BRANCH C · PRICE OR QUOTE QUESTION

Customer: "How much does it cost to have my brakes inspected?"

Advisor: "Yeah, absolutely, you've called the right place. What kind of concern are you having with your brakes?"

Customer: "They're squeaking when I drive."

Advisor: "Oh my goodness, when you have a squeak coming from your brake system, you've got to bring it in and have it inspected by one of our ASE-certified technicians. Is now a good time to bring it in?"

Customer: "I really just want to know what it costs first."

Advisor: "At no charge to you, my certified technician AND I will inspect your complete brake system and provide you a written estimate. Is now a good time to bring it in?"

✓ TRAINED CHECKPOINT · CONCERN DISCOVERY — CONCERN QUESTION BEFORE THE CLOSE ON EVERY VAGUE OR QUOTE CALL.

BRANCH D · CAN'T COME NOW

Customer: "I can't come in right now."

Advisor: "Okay, no worries. With that squeak coming from your brake system, we don't want to leave it unchecked long. I've got 11:15 or 2:15 open today. Which works best for you?"

[If the concern isn't captured yet, ask the concern question right after the time locks, then deliver the urgency line tied to the booked time. Then run the first-time or returning branch and the rest of the full inbound call script.]

The Root Concern Rule — Self-Diagnosis Defense

Even when the customer names a service and says yes to coming in, find the TRUE root concern before writing the job. Discovery runs on questions, urgency, and value only. Never warn the customer on the phone that their fix may not work. Say yes, get them in. Education comes after the inspection produces evidence.

VERSION A · THE NAMED SERVICE (OIL CHANGE)

Customer: "Can you do an oil change?"

Advisor: "Absolutely, you've called the right place. Is now a good time to bring your vehicle in?"

Customer: "Yeah, I can come in now."

Advisor: "Perfect. And real quick, what's going on with your oil system? Why are we doing an oil change?"

Customer: "I'm just overdue on the miles."

Advisor: "Got it, we'll get you right back on schedule. Have you been with us before?"

SAME CALL, DIFFERENT ANSWER · THE LIGHT CHANGES EVERYTHING

Customer: "The oil pressure light came on."

Advisor: "Oh my goodness, when your oil pressure light comes on, you've got to bring it in and have it inspected by one of our certified technicians. Is right now a good time to bring it in?"

Customer: "I just want to make sure I know how much it costs first."

Advisor: *[Warm, almost surprised. Meet the price worry, don't pitch at it.]* "Oh, no no. At no cost to you, my certified technician and I will inspect your complete oil system and provide you a complete written estimate. Are you able to bring it in right now?"

IF THE CUSTOMER PUSHES FOR A BALLPARK

Customer: "Can you just ballpark me how much the oil change will be?"

Advisor: "Yeah, absolutely. Our oil changes are on par with everybody else in town. But the reality is you've got an oil pressure light on, so I'd really prefer not to charge you anything. Come in, let me take a look at that oil light, we can determine the correct oil change that's really going to solve the problem, and I'll provide you a complete written estimate. That costs you nothing. What I really need from you right now is not money. I need you to bring the car in so we can take a look and start addressing your problem."

✓ TRAINED CHECKPOINT · ROOT CONCERN — NEVER WRITE THE JOB UNTIL YOU CAN STATE THE TRUE CUSTOMER CONCERN. IF YOU CAN'T STATE IT, ASK. QUESTIONS AND URGENCY ONLY; EDUCATION WAITS FOR THE INSPECTION.

VERSION B · THE CUSTOMER-SUPPLIED DIAGNOSIS (ENGINE)

Customer: "I've got a 2014 Chevy Silverado and my own engine. Can you guys remove the old one and install this new one?"

Advisor: "Absolutely, but let's back up for a second. Why do you need a new engine? What's happened, what's going on with the vehicle?"

Customer: "It started knocking real bad, so I found a replacement engine."

Advisor: "Oh my goodness, with a knock like that, you've got to bring it in and have it inspected by one of our certified technicians. At no cost to you, my certified technician and I will inspect your complete engine and vehicle and provide you a complete written estimate. Is now a good time to bring it in?"

[The inheritance reasoning stays in the advisor's head, never in the customer's ear: a customer-supplied part plus a customer-supplied diagnosis is double inheritance, and the shop never installs a fix for a diagnosis it hasn't confirmed. On the phone: questions, urgency, value. The evidence conversation happens after the inspection.]

The Four Inbound Mini-Bosses

Counter, then close for the visit. Never a number over the phone.

MINI-BOSS 1 · "JUST TELL ME HOW MUCH IT WILL COST."

Customer: "Yeah, I just want to know how much it will cost before I come in."

Advisor: "AT NO CHARGE TO YOU, my certified technician AND I will inspect your vehicle and provide you with a complete written estimate. Is now a good time to bring it in?"

MINI-BOSS 2 · "I ALREADY HAVE A QUOTE."

Customer: "I have a quote already from another shop. That's why I'm just looking for a price."

Advisor: "Oh, excellent! If you can bring that with you, that would be tremendously helpful! We have a Meet-or-Beat policy that allows us to price-match like-for-like quotes if we don't naturally beat the price with our estimate. To give you the most accurate pricing, though, it's best if my certified technician and I take a look first to identify exactly what's needed to fix the [customer concern]. When should we expect to see the vehicle?"

MINI-BOSS 3 · "DO YOU HAVE A BALLPARK?"

Customer: "Do you have a ballpark for me? I just want to know roughly how much."

Advisor: "I completely understand! At no charge to you, my certified technician AND I will inspect your vehicle and provide a complete written estimate so you can make informed decisions. If budget is your primary concern, I will work with you to select cost-effective solutions that still carry good warranty coverage on parts and labor. As far as a ballpark, I can pull up a tool we use called RepairPal and give you an idea of what something like this normally costs to repair."

MINI-BOSS 4 · "LET ME THINK ABOUT IT."

Customer: "I'm not sure yet. Let me think about it."

Advisor: "I completely understand. Before you decide, may I ask what's most important to you: price, turnaround time, or overall service?" *[Listen carefully.]*

The Approach + The Shop Tour

Every first-time customer. Walking pace, under 90 seconds, drink offer at the end.

[Greet at the front door or parking lot, boom board in hand.]

Advisor: "Welcome to [Shop]. I'm [Your Name] and I'll be assisting you today. May I have your keys, please?"

Customer: "Sure, here you go."

Advisor: "Thank you! Let me show you around while we get you checked in."

[Walking pace. Eye contact. Warmth.]

Advisor: "Welcome to [Shop], your certified dealer alternative. We're proud to have certified technicians ready to take care of all your vehicle needs: tires, routine maintenance, and major repairs. We also partner with trusted local specialists for accessory work like dent repair, body work, and windshield replacement, so you're covered in one place. To make your visit convenient, we offer complimentary shuttle rides, Uber or Lyft, rental car reimbursement, and loaner vehicles when available. If you stay, the waiting area has complimentary water, coffee, and tea, but there's no need to wait if transportation works better. Once you drop off, we keep you informed every step of the way: calls, texts, digital vehicle inspections, and electronic approvals for estimates, invoices, and payment. Clear, simple, transparent. We're excited to serve you today, and thank you for trusting [Shop]. Can I get you something to drink? Coffee, water, or tea?"

[Escort to the waiting lobby. Customer seated or comfortable before you step away.]

Custody — The Arrival & Intake

Keys first, concern documented, the real shop tour on the walk in, customer separated from the vehicle within 10 minutes. The keys moment closes the intake.

[Greet at the front door or parking lot, boom board in hand.]

Advisor: "Welcome to [Shop]. I'm [Your Name] and I'll be taking care of you today. May I have your keys, please?"

Customer: "Sure, here you go."

Advisor: "Thank you! Let me confirm what we have: you're here for [customer concern], and the best number to reach you is [number], correct?"

Customer: "That's right."

[Walk the customer inside past the inspection rack. Walking pace. This walk is the real shop tour.]

Advisor: "We keep this rack open so we can get you answers as soon as possible. This is also where we perform our bumper to bumper inspections, so you know the full health of your vehicle. It's not so I can present you an estimate later. It's so you have evidence and information about your car. At the end of the day we deliver safe and reliable vehicles."

Advisor: "While the vehicle is here, my certified technician and I will complete a full digital inspection with photos and video, I'll make sure the technician understands exactly what you're experiencing, and nothing happens without your approval. You'll see everything we see, and I'll personally walk you through the written estimate before anything moves forward."

Customer: "Sounds good."

[The keys moment. Hold the keys up.]

Advisor: "And you're dropping this off with me, right?"

IF THE CUSTOMER PLANS TO WAIT · THE AUDIBLE

Customer: "No, I was planning on waiting."

Advisor: "Oh, no worries. Can I get you a coffee, water, or tea?"

[Call the audible: the separate-the-customer-from-the-vehicle procedure begins. During the inspection, identify the one most critical safety concern, then return to the customer.]

Advisor: "Hey, we've identified something that requires your immediate attention. Do you mind coming to take a look at it with us?"

[At the vehicle: show them it is broken. Show and sell.]

Advisor: "We've got to have our master technician get this fixed so it's safe and reliable."

Customer: "How much is that going to cost?"

Advisor: "I don't know yet. We'll source the parts and I will call you before anything else moves forward."

[Boom board complete before the vehicle enters the bay. Customer separated from the vehicle within 10 minutes.]

The PRS Write-Up Verbal (First Base Call)

Isolate the customer's original concern. Problem, Risk, Solution, Investment, Coverage — no pause before Coverage.

Advisor: "Hi [Customer Name], this is [Your Name] with [Shop]. Is now a good time to review our findings?"

Customer: "Sure, go ahead."

Advisor: "You brought your vehicle in for [customer concern] and I inspected the vehicle with the technician personally to ensure accuracy. Good news is I was able to capture a good video of what is going on. Did you receive the DVI findings I sent via text?"

Customer: "Yes, I saw them."

Advisor: "Awesome. More good news. We've identified the cause of your concern. The problem is [Problem]. If it's left as it is, [Risk]. The proper solution is [Solution]. The total investment to take care of this today is \$[XXX], and everything is covered by our 3-year, 36,000-mile nationwide warranty on parts and labor."

Customer: "Okay, let's take care of it."

Advisor: "Awesome. I'll go ahead and get those parts ordered so we can keep moving forward, and while we're waiting on the parts we'll complete the bumper to bumper inspection and I'll reach out with any additional concerns. Is this still the best number to reach you?"

Customer: "Yes it is."

Advisor: "Great."

[If an objection comes instead of the yes, handle it normally, then seal with the same close. Obtain authorization before advancing to second base. Hang up between bases.]

The 10-Step ISO Presentation (Water Pump)

The canonical safety presentation. Structure never changes; only the technical content does.

Advisor: "Hi [Customer], this is [Advisor] from [Shop]. Thanks for your patience. Is now a good time to go over your vehicle?"

Customer: "Yes, now works."

Advisor: "I personally reviewed your vehicle with our certified technician so I could give you a clear picture of what's going on. Were you able to view the photos, videos, or the digital inspection report we sent over?"

Customer: "I did, yes."

Advisor: "You brought your vehicle in for an oil change. We've completed the initial inspection and I wanted to review what we found. The good news is your digital inspection report clearly documents everything with photos and notes so you can see exactly what we're seeing, and we caught this early, before it turned into a bigger issue."

Customer: "Okay."

Advisor: "More good news: during our inspection we found that your water pump is leaking, which is separate from your original visit and something we can take care of now before it leads to further damage. If left as is, a leaking water pump can lead to engine overheating, coolant loss, and eventually major engine damage. The proper repair is to remove and replace the water pump and complete a full cooling system service so everything is clean, sealed, and operating at the correct temperature. The total investment for today's work, including the oil service you already approved, is \$1,695.46, parts and labor included, and this work is covered by our 3-year, 36,000-mile nationwide warranty on parts and labor."

Customer: "Alright, let's go ahead and do it."

Advisor: "Okay, great. I'll get the parts ordered, and while we're waiting on those we'll finish the bumper to bumper digital inspection and I'll reach out if anything else needs attention. Is this still the best number to reach you?"

Customer: "Yes, that number is best."

Advisor: "Perfect. I'll get everything moving and call you with an update."

Second Base — Additional Findings Call

Separate call after first base authorization. Open with reassurance: the approved work is in progress. Everything presented here is additional. Expand with inspection findings, most safety-critical first.

Advisor: "Hey [Customer Name], this is [Your Name] at [Shop]. We've completed the service inspection and we're in progress on everything we've already talked about. Plus, we've completed the full vehicle inspection and we have a couple of additional concerns that require your attention. Is now a good time to review the inspection findings?"

Customer: "Sure."

Advisor: "Did you have a chance to review the pictures and videos I sent over? I refreshed the report, so there's more on there now."

Customer: "I did."

Advisor: "Good news is your vehicle's overall health is in EXCELLENT condition! The suspension system is operating properly. However, the axle boot is leaking grease. It's not an immediate failure, but left unaddressed it can damage the joint. The proper repair is to replace the CV axle to ensure proper lubrication and protection. To address all the additional concerns, the updated total investment is \$[XXX], and obviously everything is covered by our 3-year, 36,000-mile nationwide warranty on both parts and labor. With the [safety or customer concern] in progress, I can go ahead and order these parts and have the technician take care of everything at once. I'll call you with an updated ETA when the parts arrive."

Customer: "Okay, that works."

Advisor: "Great, we'll get the parts ordered right now. The last thing I'm going to do is check for any upcoming scheduled maintenance and call you back with the maintenance plan to protect this investment, so work doesn't build up like this again, and you know what to anticipate for your next visit!"

[Hang up. Reset. Third base is its own call.]

Third Base — Scheduled Maintenance Call

Soft sell. By this call three or four conversations have already happened: open with in-progress reassurance, then the additional maintenance items. Calm tone, no urgency stacking. A real opt-out is part of the script.

Advisor: "Hi [Customer Name], this is [Your Name] with [Shop]. Everything we've talked about is in progress and moving right along. I'm calling back with that maintenance plan, a few additional maintenance items to review. Is now a good time?"

Customer: "Sure."

Advisor: "The remaining items fall into preventative maintenance. Your transmission and differential fluids are overdue or coming due within the next 10,000 miles based on mileage, so ideally we should address those two services today while we have the car. Addressing them now keeps the systems up to date and maintains the lifetime protection plan, leaving the only services due next visit [services due], and the service after that will be the [plan]. Addressing the items due will move your total investment for today's work from \$[XXX] to \$[XXXX]. These services are covered by the lifetime protection plan that keeps major system components like the [expensive part] covered for unlimited miles, so long as the services don't go overdue. Can I have the tech get everything fully up to date while it's in the shop?"

Customer: "I'm not sure about doing all of it today."

Advisor: "No problem at all. We can absolutely schedule the services for your next visit so nothing goes overdue. Would you like me to set that up now so it's on the books?"

Boss Battle 1 — "I'm Selling the Car"

Reframe repair cost against the real alternative: buying someone else's unknown history.

Customer: "I appreciate everything, but I'm probably just going to sell it. I don't want to put more money into it."

Advisor: "I completely understand. Big repairs can make you step back and rethink things. Out of curiosity, are you planning to replace it with something newer or used?"

Customer: "Probably used. I don't want another big payment."

Advisor: "That makes sense. Let me give you something to consider. Most used vehicles today are still a major investment, and you're inheriting someone else's maintenance history. With your vehicle, we know exactly what condition it's in because we just inspected it bumper to bumper. Based on what we saw, this vehicle still has strong life left in it. Let me ask you this: if you could purchase this exact vehicle, knowing the major systems have just been inspected and repaired, for a fraction of the cost of another vehicle, would that make sense?"

Customer: "I didn't think about it that way."

Advisor: "Right now you're not throwing money at an old car. You're making a smart investment in a vehicle you already own and understand. The average used car today runs up to \$25,000, and the insurance rates are outrageous. To get this vehicle back to safe and reliable, we're talking about [total investment]. I completely understand if you're simply in the market for a new car, but if you're looking to make a smart financial decision, my professional advice would be to repair the car instead of buying a used car that may need the same in repairs, or more."

Boss Battle 2 — "The Price Is Too High"

Own the position. Never apologize for price. Never discount on reflex.

Customer: "That just seems like a lot."

Advisor: "I hear you. Let me ask, is it more than you expected, or are you comparing it to another estimate?"

Customer: "It just feels high."

Advisor: "Fair enough. We're not positioned as the lowest-priced option in town, and that's intentional. We invest in experienced, certified technicians. We back our work with a 3-year, 36,000-mile nationwide warranty. And we stand behind it with real support if something ever comes up. You're paying for the parts, the certified installation, the warranty that protects them, and a shop that stands behind the work. You're investing in doing it correctly the first time. Have you ever gone with the cheaper option before and ended up paying for it twice?"

Customer: "Yeah, I suppose."

Advisor: "That's exactly what we're helping you avoid. Let's go ahead and get this handled properly so you don't have to revisit it again. I'll get it moving and keep you updated. Is this still the best number?"

Boss Battle 3 — "I Don't Have the Money Right Now"

"No money" means "no money TODAY." Sell the option of solving it now and paying later.

Customer: "I just don't have the money today."

Advisor: "I completely understand. Auto repairs rarely show up at a convenient time. Always after a big expense, or when you least expect it. Something a lot of our customers LOVE to take advantage of is our flexible payment options. If I can take care of the repair now and let you pay me back with no interest, can I get the parts ordered and move forward?"

Customer: "Yes!"

Advisor: "I just sent you a link to fill out a form with one of our payment partners. Once it's complete I'll see it come through on my side and we can go from there! Did you receive the link?"

[Stay on the phone while they complete the form. Close the moment the approval comes through.]

Boss Battle 4 — "I Need to Talk to My Spouse"

The Three-Way Bypass: both decision-makers hear the same story, first-hand.

Customer: "I need to run this by my spouse first."

Advisor: "I completely understand. Decisions like this are definitely best made together. To make sure both you and your spouse have all the correct information at the same time, the most efficient way to proceed is a brief three-way call. I can review everything I just covered, you'll both be fully informed, and you can make the best decision for your situation. Is your spouse available to join us now, or should I reach out to them to review this information and call you back?"

Customer: "Let me try to get them on the phone."

[On the three-way call, re-run the PRS and warranty exactly as delivered the first time.]

Boss Battle 5 — "I'm Going to Wait"

Clarify risk if safety; reframe value if maintenance. Schedule whatever gets deferred.

VERSION 1 · SAFETY CONCERN

Customer: "I think I'll wait on that."

Advisor: "I understand. I do want to be transparent. This one falls into a safety category. Right now the brakes are past normal wear and into potential damage. That can affect stopping distance and control. Are you planning to drive it?"

Customer: "Yes, just around town."

Advisor: "Even short trips carry risk in this condition. My job is to protect you, not pressure you. If budget is the concern, we can look at payment options, but I don't recommend postponing something that affects safety."

VERSION 2 · PREVENTATIVE MAINTENANCE

Customer: "I'll just wait on the fluid services."

Advisor: "No worries, they're not urgent today. What we're seeing in those systems is buildup that doesn't show symptoms until damage starts. Doing them now protects the components while everything is accessible. If we skip them today, are you planning to schedule it soon, or wait until something starts acting up?"

Customer: "Probably the next oil change."

Advisor: "Understood. Just keep in mind preventative service is always less expensive than corrective repair. If it makes sense to bundle it while it's already here, we can space out the cost as well."

Boss Battle 6 — "You're Always Trying to Sell Me"

The Professional Obligation frame: from salesperson to fiduciary.

Customer: "Every time I come in, you try to sell me something."

Advisor: "I appreciate you saying that. My goal isn't to sell you. It's to inspect your vehicle thoroughly and give you accurate information. Every car that comes through our shop receives a full digital inspection. That means checking safety components, wear items, and potential issues before they become problems. You're never obligated to approve anything. But it's my Professional Obligation to make sure you know what we see. Would you like me to walk you through today's inspection results so you can decide what makes sense?"

Boss Battle 7 — "I Need My Car Today"

Solve transportation first, then return to the repair.

Customer: "I really need my car today."

Advisor: "I understand. Let's solve the transportation side first. We have loaner vehicles, Uber rides, and pickup and drop-off options. Would one of those help make this easier for you?"

Customer: "An Uber ride would help."

Advisor: "Perfect. I'll get that arranged so we can repair your vehicle properly without rushing anything. Once it's complete, I'll give you a call. Still the best number?"

Boss Battle 8 — "Can I Get a Parts and Labor Breakdown?"

You sell a protection program, not parts and minutes. Refuse the commodity frame, warmly.

Customer: "Can you break down parts and labor?"

Advisor: "I can absolutely review the estimate with you. Just to clarify, we're not structured as a parts-and-labor shop. We're structured around protection and execution. You're paying for certified technicians, proper procedures, warranty coverage, and post-repair support, and the components come backed by all of it. We also include a 3-year, 36,000-mile nationwide warranty, roadside assistance, a quality-control inspection, and digital documentation. That's why it doesn't break down into a simple commodity model. Does that help clarify where the value is?"

Boss Battle 9 — "I Want a Second Opinion / I Can Get It Done Cheaper"

Post-inspection only: the evidence exists, so education is allowed. Empathize, disarm with honesty, huddle with the technician, then bring in the Short Stop. The Short Stop never contradicts the advisor: reinforce first, then problem-solve with the customer. The prize is not this repair. The prize is a customer for life.

Customer: "I appreciate you walking me through everything, but honestly, your price seems high. I think I want to get a second opinion and shop around, see if I can get it done cheaper."

Advisor: "I completely understand, and that's a fair thing to want. Let me ask you this first: have you ever paid for something twice and not got it done?"

Customer: "Yeah, actually. That's part of what I'm worried about."

Advisor: "That's exactly what I want to protect you from. And I'll be straight with you: the reality is we are able to do this cheaper. I don't want you to think that this is set in stone and this has to be done. This is the proper repair. This is the most comprehensive solution to solve the problem and ensure that we don't have problems anymore. We can definitely shop some cheaper parts, and that's going to reduce the price, but it might also reduce the warranty."

Customer: "Okay. I'd still like to see what it would run somewhere else."

Advisor: "Before you do that, give me two minutes. Let me grab the technician who had his hands on your vehicle today, we talk to him, and we find out if there's a smarter way to get this done. You'll be getting your second opinion from the person who actually inspected it. Give me one second."

[The huddle happens away from the customer first: advisor and technician. Can it really take that many hours, or can we work smarter to reduce the cost? Then the Short Stop joins the customer with the DVI open. Ideally the Short Stop IS the technician; realistically it is whoever the shop trusts to run this play. One hard rule: the Short Stop NEVER contradicts what the advisor already told the customer. Contradiction reads as the shop making things up, and it destroys the advisor's trustworthiness. Reinforce first. Problem-solve second.]

Short Stop: "Hi [Customer Name], I'm [Name]. I went through your vehicle today, and I want to start by confirming what [Advisor Name] walked you through, exactly as he presented it. Here's the photo of [the finding]. If it's left as it is, [Risk]. The repair he presented is the proper repair and the right way to solve this. Nobody here is making anything up."

Customer: "I believe you. It's just more than I can do right now."

Advisor: "Then let's solve that together. Can we create a repair plan where we take care of a portion of it today and move on?"

Short Stop: "And while we build that plan, we can look at every option we've got. We have flexible payment options that can spread the investment out, and [Advisor Name] can talk with the owner about the

labor time and about taking care of the [accompanying service] that goes with this job. The goal is a number that makes sense for you and still fixes this the right way."

Customer: "Okay. If we can get to a number that works, I'd rather just have you guys do it."

THE CUSTOMER-FOR-LIFE CLOSE

Advisor: "That's exactly what we want. Thank you for working through this with us instead of driving across town. We'll find the middle ground that makes sense for everyone. And from here on out, whenever this car needs anything, you'll never have to wonder where to take it."

[The prize is not winning this repair. The prize is programming one sentence into the customer's mind: "If I have a problem with my car, it goes to this shop."]

Boss Battle 9 Worked Example — The Full Engine Reseal Repair Plan

The customer expected an upper and lower oil pan reseal and budgeted \$1,500 to \$2,000 tops. The inspection shows the upper pan, lower pan, timing cover, and both valve covers all leaking. The components all touch, so the proper repair is a full engine reseal: 33 hours of book time, about \$7,000. Good-standing customer, and the objection is purely price.

Customer: "I came in for the oil pan reseal. I budgeted maybe two thousand dollars for this. Now you're telling me seven thousand. I think I'll just take it to another shop."

Advisor: "I completely understand. You planned for one number and heard a very different one. Let me ask you this first: have you ever paid for something twice and not got it done?"

Customer: "That's exactly what I'm trying to avoid."

Advisor: "Me too. So let me be straight with you. The pans you came in for are leaking, and so are the timing cover and both valve covers. All of those seals touch each other. If we only reseal the pans today, we're opening up an engine we know is leaking in three other places, and that's not the proper repair. The proper repair is to reseal the engine as one job. Before you go anywhere, give me two minutes with my technician."

[The huddle, away from the counter: "Does this really take 33 hours, or can we work smarter and bring the cost down?" Then the Short Stop joins the customer with the DVI open. Reinforce first. Problem-solve second.]

Short Stop: "Hi [Customer Name], I'm [Name]. I went through your engine today, and I want to confirm what [Advisor Name] told you, exactly as he presented it. The upper pan, the lower pan, the timing cover, and both valve covers are all leaking. Here are the photos. They all touch each other, so the proper repair is a full engine reseal. Nobody here is making anything up, and if this could be done properly for two thousand dollars, I would tell you."

Customer: "I believe you. I just can't do seven thousand dollars right now."

Advisor: "Then let's not make it seven thousand dollars today. Can we create a repair plan where we take care of a portion of it today and move on?"

Short Stop: "And we've got real options to work with. We have flexible payment options that can spread this out. [Advisor Name] can talk with the owner about the labor time, and about taking care of the oil service that goes along with this job. Between the plan and those options, we can get this to a number that makes sense."

Customer: "If you can get it somewhere I can manage, I'd rather keep it here. You guys have always taken care of me."

Advisor: "And we always will. Thank you for working through this with us instead of driving across town. We'll build the plan, I'll make those calls, and I'll have real numbers for you before anything moves forward. From here on out, whenever this car needs anything, you'll never have to wonder where to take it."

[The middle ground has to make sense for everyone: the customer gets a price point that works, and the shop keeps the repair, the relationship, and every visit after it. The teaching behind the numbers lives in the Advisor Book, never in the dialogue.]

L.A.S.T. Recovery — The Four Hot Counters

Listen fully before speaking. No "but." No "policy." Specific, time-bound, owned solve. Thank at the end.

HOT COUNTER 1 · NO CALLBACK FOR TWO DAYS

Customer: "My car's been here for two days and no one called me!"

Advisor: "Okay, walk me through it. When did you drop it off, and what were you expecting to hear?"

[Listen. No interrupting.]

Advisor: "I completely understand. Not hearing back when you're waiting on your car is one of the most frustrating things, and that's on us to do better. Here's what I'm going to do. I'm pulling your RO right now. I'll get you the current status, a real ETA, and I'll call you back personally within 30 minutes whether the news is good or not. Thank you for letting me know. We'd much rather hear this from you than read about it later."

HOT COUNTER 2 · THE BILL IS HIGHER THAN THE QUOTE

Customer: "The bill is way more than what you quoted!"

Advisor: "Tell me what number you were expecting and what number you're seeing." *[Listen fully.]*

Advisor: "That's a fair concern. If you were planning on one number and the bill comes in higher, that breaks trust, and I get why you're frustrated. Let me pull the estimate and the final invoice side by side. I'll walk you line by line through what changed, and if any of that wasn't properly authorized, I'll make it right today. I appreciate you raising this instead of just walking away unhappy. Let's figure it out."

HOT COUNTER 3 · THE NOISE CAME BACK

Customer: "I just paid for this last month and the same noise is back!"

Advisor: "Tell me about the noise. When does it happen, is it exactly the same, did it ever fully go away?"

[Listen fully.]

Advisor: "That's exactly the kind of thing that should not be happening, and I understand why it feels like we let you down. Here's what we're going to do. We carry a 3-year, 36,000-mile warranty on parts and labor, so this is covered. I'm getting you on the schedule today or tomorrow, no charge, and we'll diagnose it personally. Can you bring it in this afternoon, or in the morning? And thank you for bringing it back to us instead of going somewhere else. We're going to make this right."

HOT COUNTER 4 · GREASE ON THE SEAT

Customer: "Your tech left grease on my seat."

Advisor: "Can you show me?" *[Walk to the car. Look. Do not minimize.]*

Advisor: "You're right, that's not what should happen. That's on us. Here's what we're going to do. We use seat covers on every job and that wasn't followed today. I'm going to get this professionally detailed at our cost and have your car back to you cleaner than when it came in. I'll arrange a loaner or an Uber so you're not without a ride. When works best? And thank you for telling me directly. This is how we get better, one customer at a time."

The Re-Open Calls — Short Stop & Manager Follow-Up

Fresh voice re-opens a missed safety sale. Concerned tone, never pushy.

THE SHORT STOP RE-OPEN

[Fresh voice, not the original advisor.]

Advisor: "Hi [Customer Name], this is [Your Name] from [Shop]. I understand you've been working with [first advisor]. Do you have a second for me?"

Customer: "Sure, what's this about?"

Advisor: "Great. I'm just calling about [the item that must be handled to keep this car safe and reliable]. I know [first advisor] called to review the concern with you, and he's informed me that you didn't want to proceed with the repair. Is that accurate?"

Customer: "Yeah, it's just not in the budget right now."

Advisor: "I see, and that brings me to the reason I'm calling. I wanted to ensure we effectively communicated the severity of the concern. [Simple Problem]. [Simple Risk]. [Minimum viable Solution]. If budget is the main concern, we have flexible payment options that can take care of the safety issue today. Can I get that set up for you?"

THE MANAGER RE-OPEN

Advisor: "Hi [Mr./Mrs. Customer], this is [Manager Name] with [Shop]. I just wanted to personally thank you for your visit and check in on your vehicle. Did I catch you at a good time?" *[Pause]*

Customer: "Sure."

Advisor: "One reason I'm calling: there was a safety concern discussed during your visit. I reviewed it myself, and I just want to make sure you have a plan to address it, whether that's with us or elsewhere. My goal is simply to make sure you and your family are protected."

Customer: "We haven't really figured it out yet."

Advisor: "If there's anything we can do, scheduling, transportation, payment options, we have availability. Would you like us to take care of that for you?"

Home Plate — Booking the Next Visit

Final invoice review. Reinforce value, direction-facing close, next visit on the books before they leave.

Advisor: "[Mr./Mrs. Customer], thank you again for trusting us with your vehicle today. Here's what we completed: [services]. Everything is digitally documented in your invoice. Your total investment today is \$ [XXX]. Which direction would you like your vehicle facing when we bring it up?"

Customer: "Facing out would be great."

Advisor: "You got it. Before you head out, a few benefits included with today's service: our 3-year, 36,000-mile nationwide warranty, 365-day roadside assistance, a post-repair inspection, and maintenance reminders. Looking at your maintenance schedule, your next service will be due around [date or mileage]. Let's get that on the books now so it's one less thing to think about. Does a morning or an afternoon usually work better for you?"

Customer: "Mornings, usually."

Advisor: "Perfect, I have a 9:15 on [date]. I'll put you down and send you a reminder as it gets closer. We appreciate your business, [Customer Name], and we'll be here whenever you need us!"
